Methode Electronics Malta Ltd. is a world-class custom-engineering based manufacturing company. It specialises in the design of highly technological electronic devices and components.

We service a wide range of industries including the Automotive, Railway and Transportation, Military and Aerospace, Medical, Communications, Consumer and Commercial white goods, Alternative and Renewable Energy and the Heavy industry. Methode has a global outreach with Engineering, Manufacturing and Sales divisions across continents. Its multinational team of in-house engineers focus their efforts in four market areas, namely, in User Interface-HMI solutions, Sensors and Switches, Power, and Data products.

Methode proudly serves a multitude of companies that are respected worldwide, including globally renowned automotive brands. With most of us not realising, there is a Methode product in almost every car that we see roving in our roads.

It is simple; send us a covering letter highlighting your strengths, research experience and main interests together with a CV to:

hr@methode-eur.com or academy@methode-eur.com

We can train you in:

- Automotive control and sensor development processes
- Conversion, switching, and control in power electronics
- Lab testing – data acquisition, interpretation and materials analysis
- Design and manufacturing processes of high speed automated assembly equipment
- Operations research, statistics and reliability calculation
