

Delete/Forget Wireless Network in Mac OS X

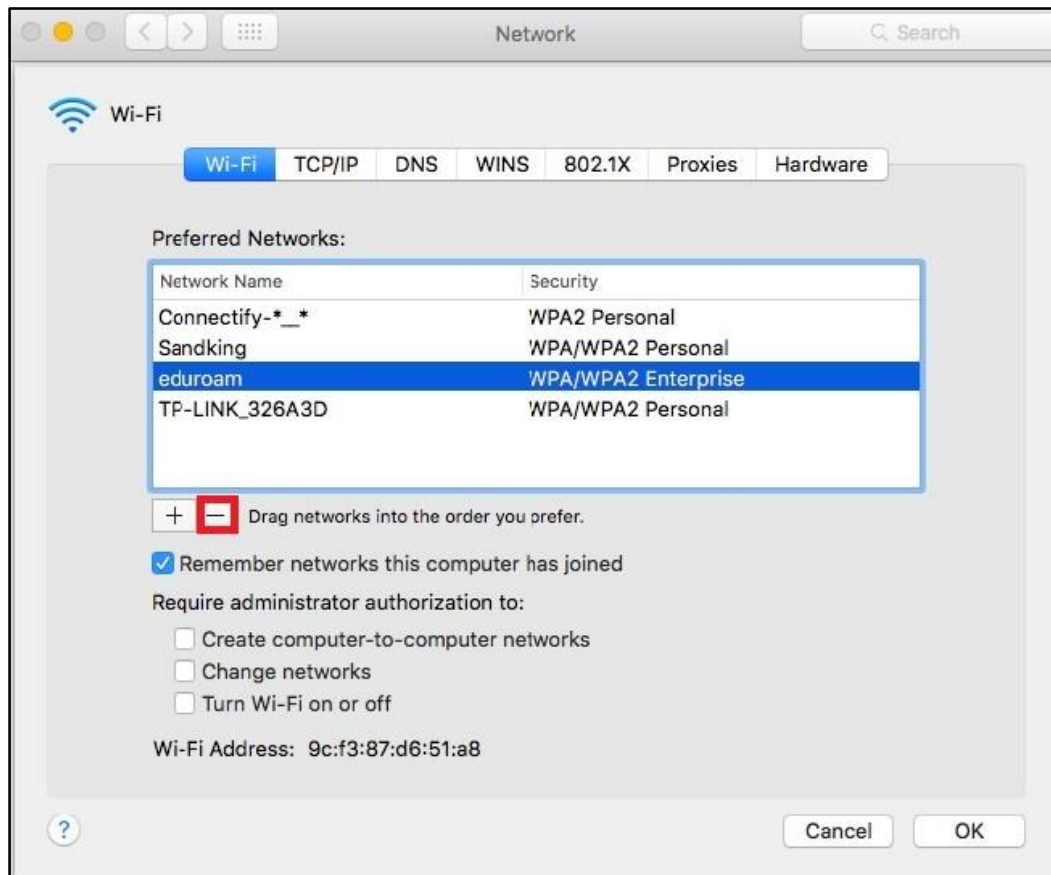

1. Select the WiFi symbol along the top menu bar and click on **Open Network Preferences** at the bottom of the drop down menu.

2. Select on Wi-Fi in the menu on the left and click **Advanced** located at the bottom right of the pop-up window.

3. Select the **eduroam** network and click the minus sign as indicated in the image below. Click **OK**.

To set-up **eduroam**, follow the guides available at:

<http://www.um.edu.mt/itservices/facilities/eduroam>
