Master of Science

Course overview:

The intention of this course is to instil scientific rigour in the endeavour to propose improvement in the area of specialisation. This course will acquaint you with skills pertaining to dissertation preparation and presentation methodology. In particular, you will acquire skills in the research, augmentation, evaluation, presentation, defence and scientific procedure of the selected field. The presentation shall consist of your appraisal of a subject area related to that of the dissertation.

The Course shall be offered in areas of study in ICT where the Faculty can offer expert guidance and supervision. You will be required to write a dissertation in one of the areas listed to which 80 ECTS credits are assigned, and shall consist of a maximum of 35,000 words, as directed by the Board on registration.

If you are an applicant who is interested in pursuing an M.Sc. by Research with the Faculty of ICT, then you are to consult with academic staff members of the departments before submitting your application and research proposal. Applications received without such a proposal will not be accepted. If required, this process may be coordinated by contacting the Dean or one of the Heads of Department.
