

Glyn Thomas

Airbus

Glyn Thomas is a Senior Expert in flexible, processed and HTS payloads. He is currently working within the payload R&D division helping to define Airbus Roadmap for advanced payloads and the supporting digital and RF equipments needed to make these payloads an industrial reality.

Glyn was deputy Chief Engineer for Airbus Defence and Space payload equipment's division during the period 2010 to 2014. He previously managed research and development where he generated a number of key patents in the fields of flexible communications payloads. Prior to this Glyn worked in both systems engineering and microwave design roles on the RADARSAT 2 Synthetic Aperture RADAR system.

Glyn graduated from St Andrews University with a degree in Theoretical Physics and he also holds a Master's degree in Microwave Solid State Physics. Glyn has completed Airbus senior expert courses in Leadership and Programme Management.
