Chlorine gas is a powerful
disinfectant and is used
in the treatment of
wounds and ulcers.
It is also used in the
treatment of
respiratory diseases.
The gas is prepared by
the action of
hydrochloric acid on
manganese dioxide.
The gas is a
yellowish green
gas with a
pungent odor.
It is highly
toxic and
irritant to
the mucous
membranes.
It is used in
the treatment
of
respiratory
diseases.

Dear Mother

I have just received your letter of the 10th inst.

and am glad to hear from you.

I am well and hope these few lines will find you the same.

I have not much news to write at present.

I am, however, very anxious to hear from you.

I have not much news to write at present.

I am, however, very anxious to hear from you.

I have not much news to write at present.

I am, however, very anxious to hear from you.

I have not much news to write at present.

112

A close-up photograph of a textured surface, likely the cover or endpaper of an old book. The material has a light beige or cream color with a fine, grainy texture. A repeating pattern of small, raised, rectangular elements is visible, creating a subtle relief effect. The lighting is soft, highlighting the texture and the pattern.
