Brolac G L O S S

keeps its good looks longer

An alkyd paint film that is doubly re-inforced by hard resin and heat-toughened oils - that's Brolac Gloss Enamel. It is hard yet flexible, and tough. Like a boxer riding a punch, Brolac bends instead of cracking or flaking under accidental bumps from chair legs, children's heels. This is why Brolac Gloss Enamel stays bright and cheerful through the rough and tumble of family life. In LIVED IN homes, Brolac Gloss keeps its good looks longer.

WHITE *A really clean permanent white made with special non-yellowing pigments. The white that stays white*

COLOUR *Wide variety of bright, gay colours and modern pastel tints. Non-fading.*
