LINGUISTIC ANALYSIS OF FR. MAGRI’S FOLK-TALES

By J. CASSAR-PULLICINO

Students of folk-lore in Malta are seriously handicapped by the lack of a Corpus of Maltese Folk-Tales that could make a scientific study of this type of popular fiction possible in its various aspects. The material collected so far is scattered in various publications that are often difficult to trace, and many more tales that are still current await collection.

The following are the main printed sources:

Bonelli, L., Saggi dei Folk-lore dell’isola di Malta, Palermo, 1895. (Contains, inter alia, summaries in Italian of twelve Maltese tales)

X’Jgħejd il-Malti fuq id-Dinja ta’ Taħt u fuq ir-Rjieb. Malta, 1905 (in Mogħdija taż-Zmien, No. 44).

Stumme, H., Maltesische Studien: eine sammlung prosaischer und poetischer texte in Maltesischer sprache..., Leipzig, 1904. (German translation Maltesische Märchen Gedichte und Rätsel in Deutscher Übersetzung. Leipzig, 1904).

Galea, L. and M.A. Murray, Maltese Folk-Tales, Malta, 1932. (Translation of five Maltese tales originally published by Fr. Magri. Some of the stories differ from Magri’s versions, but the differences are pointed out in the notes).

The Maltese texts of the tales by Magri, Stumme and Bonelli make up a total of 102 tales, including variants and repetitions. Fr. Magri’s collection, including 13 variants, totals 62, which is by far the greatest single
collection available in Maltese. Stumme's collection, including variants, numbers 37 and forms an important addition. Stumme's texts deserve a separate study from a linguistic point of view, but unfortunately Ilg's collection of 139 tales and drolleries, being in German translation only, is of no linguistic interest and cannot therefore be considered in this study. For the same reason Bradley, Murray and Farini fall outside the purpose of this article, while Bonelli's texts are too few in number to provide sufficient data for a detailed study.

Limiting ourselves to Magri's work, we shall start by giving a complete list of his folk tales, with English translations in brackets. No. I in Magri's collection is a general introduction to the tales contained in Hrejjef Misserijietna: Nos. II-XV follow Magri's own enumeration, to which Nos. XVI-XXVII have been added to cover the tales published in his other publications.

Nos. II, III, IV, XV(ii)-(vii), (xiii)-(xiv), (xvi)-(xviii), XVII and XXVII in the above list should more appropriately be considered as aetiological tales, purporting to explain a cause. The remaining stories fall neatly under the more specific heading of Fairy Tales. For the purpose of this study, however, all the texts published by Magri have been considered.

Magri’s Style and Sources

Magri’s literary style has been highly praised by Professor P. P. T.
And indeed his tales are a source of lasting wonder and pleasure to generations of children and of adults alike. Important considerations in this respect are: (i) the age in which Magri collected his fairy tales, (ii) the personal style of his informants, and (iii) whether Magri himself tampered with the oral texts.

In 1883 Guillaume Spitta-Bey, explaining his own method for the transcription of Egyptian fairy tales, wrote:

J'ai transcrit directement le texte arabe d'après les paroles et, pour ainsi dire, sous la dictée des gens du peuple. Jamais je ne me suis permis d'y rien retoucher. On trouvera donc réunies ici toutes les imperfections de style que la manière naturelle et irréfléchie de raconter comporte, à savoir: des répétitions... des changements et des contradictions... même des confusion, etc... On remarquera aussi partout une grande mobilité dans la prononciation, dont les variations continues sont justement ce qui anime les paroles parlées et leur donne une charme particulier, à l'endroit des paroles transmises par l'écriture, où une orthographe impitoyable fixe et arrête la langue et lui fait perdre les nuances qui ne veulent pas se soumettre aux lois dictées...

Magri collected his tales in the last years of the 19th and the early years of the 20th century. Now this was a period when the Maltese language, after centuries of neglect, already showed signs of considerable Sicilian and Italian infiltration that is reflected in Magri's tales, words that would almost certainly not have found their way in the texts had the tales been collected in earlier centuries. To a certain extent the language and style of the folk-tales of any country change with the centuries and from narrator to narrator. Magri was well aware of this, and in trying to find a solution he managed to create a literary masterpiece without falling far short of the ideal set out by Spitta-Bey.

Writing on "Displaced" Folktales', in Humaniora: Essays in Literature, Folklore, Bibliography honoring Archer Taylor on his Seventieth Birthday (New York, 1960, p. 161) Professor Reidar Th. Christiansen says: 'All too often investigators have lost sight of the various vicissitudes a tale undergoes before it is finally available for study. The prudent worker must always consider the person who told the story in the first place, the field collector who recorded it (at least before fidelity could be achieved through mechanical recording apparatus), and last, but not least, the person who finally edited the tale for publication, for all have a share in the folktale text before us. For these reasons a critical analysis of variants is im-

perative, and especially so with regard to folktales recorded, say, within the last fifty years.'

In some cases Magri indicates the provenance of his tales, giving his informant's name and locality. In others he only gives the place where a particular tale was heard, while in others again no indication whatever is given, as in 11 out of the 12 tales included in X'igbd il-Malti jen Gherf bla miktub tal-Maltin. The majority of the tales were collected 'first hand'; Fr. Magri heard them personally and took them down under dictation. Others were communicated to him by educated people who were interested in his work. These educated informants included, according to Magri, Rev. Gaetano Sammut, of Attard, Mr. and Mrs. A.M. Galea, who wrote down several of his tales, Rev. Michelangelo Spiteri, of Rabat (Gozo), Fr. Dwardu, of Għajnsielem (Gozo), and Mr. V. Mifsud Bonnici, who was himself a keen collector of popular idioms and sayings. To these may be added the name of Theresa Cannataci, first cousin to Magri's mother. The latter became a widow at the early age of eighteen, and on her second marriage her two children by her first husband, Emanuel and Salvatore, passed under the care of her cousin Theresa, from whom Fr. Magri took down various tales, according to information supplied by Theresa's niece, to whom iz-Zija Żeż is part of a living family tradition. Ilg also provided Magri with a few texts, according to a personal communication received in July, 1960 from Frau Bertha Koessler-Ilg, who is now living in Argentina. His informants from among the unlettered 'folk' included Salvu Kajuwa or ta' Borboğa (Xagħra, Gozo), il-Pecc̄a (Rabat, Gozo), Ġamri tal-VuljaĊ (Xagħra, Gozo), Patist ta' Hili (Rabat, Gozo) and Nikol Għabdilla (Qrendi, Malta). To these five informants Magri owed the three tales included in X'igbd il-Malti fuq id-Dinja ta' Taħt u fuq ir-Rjieħ, with their four variants. In one other instance (No. XII) Magri gives the name of the informant — President Micallef's mother, to whom he was related without, however, giving the place. For the majority of his tales, however, we are left wondering as to who his informant could be. Fr. Magri's silence on this matter could hardly have been due to lack of scientific preparation, for throughout his writings he showed an ability to combine accuracy with an easy and popular presentation of facts, theories and ideas. One is led to suspect that he suppressed the names of his other informants because at that time anything written in Maltese, let alone fairy tales, was considered infra dig by the educated classes. One may also surmise that, both in the case of his cousin and in that of other respectable and educated families where Magri heard his tales, more often than not recounted by

4 Mrs. Caterina Gerada, née Cannataci, of Zejtun, who was herself brought up by her aunt Tereża.
ladies and gentlemen who had learned them from their maids and servants in the nursery, Fr. Magri was loath to reveal the name of his immediate source in order not to embarrass his friends.

Whatever the reason, the fact remains that Magri drew his material from various localities in Malta and Gozo. The greater number came from Gozo: from Rabat, (Victoria) Nos. XII(var.), XIII, XIV, XV(xi), XV(xii), XVI (var.), XVIII(+2 var.); from Sannat Nos. XIII(var.), XV(viii), XV(x); from Gharb Nos. VI and XV(xv); from Xaghra Nos. XVI and XVII. The tales from Malta came from the following localities: Bormla (Cospicua) No. V; Tarxien Nos. VII (i)-(v); Gudja No. VIII; Valletta Nos. IX and XI -- the latter from the Mandragg area; Luqa No. X(i); Lija No. X(ii); Attard No. X(ii); Zebjut No. XV(i); Zurrieq No. XV(ix), and Qrendi No. XVIII (Var. iv).

By and large, it may be said that the social milieu giving rise to the collection is such that one could rightly expect the tales published by Magri to be real and genuine folk texts of the utmost importance as a linguistic document of the early 20th century. To what extent they can, in reality, be considered as such will be seen from the following observations.

In his preface to X'jgħid il-Malti fuq id-Dinja ta' Tāḥt (1905) Magri explained his method of collecting and transcribing Maltese folk-tales. The following extract is relevant to our purpose:

'When I hear someone telling Maltese stories, I try to hear them from many others; then I compare one with the other in order to find out whether they say the same thing and whether they relate the story in full; I try to find out how it was told in the past, before Maltese began to be mixed, and before books by foreign writers were read. When in an old story I find that today they introduce things or words which did not exist or were not said in the past, I make them conform to words used by village people when I was a boy. If now, for instance, you hear someone make people of the times use the words: "Let's have a coffee" you can't very well use these words in a story about events which happened when coffee was still unknown in Malta; therefore one must say: "Let's have something to drink"; if today you hear somebody place in the mouth of a villager of a hundred or two hundred years ago the words brodu (broth) and biljut (boiled meat) you must, willy nilly, say meraq, or bqajqa or imgholli, because that is what they said in those days.'

This passage proves: (a) that Magri very rightly took great pains in collecting as many variants as possible before establishing the 'definitive' text of a particular folk-tale; (b) that he tried to substitute old-sounding, archaic words for comparatively recent loan-words whenever he felt justified in doing so.
In the same preface Magri went on to say: 'Therefore I do not invent anything in these stories and I confess that the modifications which I mentioned are very few and hardly worth mentioning. To make ourselves clearer, I must here point out that our village people, when we city people ask them something, try to speak differently and change the words, so to say, to speak as we do. Hence very often one can hardly know what they are saying and how they say it. To do so one must find them unprepared when they are talking among themselves; or after a long time they have made your acquaintance and realise that you don't mean to poke fun at them, when they may tell you the thing as it is'.

Two factors should therefore be kept in mind in considering the tales as linguistic texts: (a) the changes, however slight, that Fr. Magri made, and (b) the alterations due to the informers themselves in dictating the tales. Both factors are difficult to assess with any degree of certainty.

Our analysis of Magri's tales will deal with three aspects: (i) initial formulas, (ii) closing formulas, and (iii) lexical material (Semitic and Romance). Whenever possible this analysis will be illustrated with comparative data from Arabic and Sicilian folk-tales.

**Initial Formulas**

These form an integral part of the technique of telling fairy tales. The formulas are more or less fixed, but some lexical addition is possible within the limits of the traditional patterns. The more important types as recorded in Magri's tales are:

(i) Formulas containing the clause *kien hemm* (there was; also, there were), or its later developments *darba kien hemm* (once [upon a time] there was [were]), *darba wahda kien hemm* (there was [were] once), *mela darba kien hemm* (well, there was [were] once), *mela darba wahda kien hemm* (well, once upon a time there was [were]).

(ii) A direct statement plunging straight into the story: Ex. *Is-Sultan Salamun kellu huq għax qisb* (King Solomon had a very clever brother) [No. XIX].

(iii) An initial statement in reported speech: Ex. *Iqbidu li fil żmeniżet l-imghoddija, meta x-xjuh kienu jikbru bil-bosta...* (It is said that in olden times, when old people reached a very advanced age... ) [No. XXI]. This type occurs only once in Magri's tales.

Examples of variants of (i) above occur in various tales as follows:

(a) *Mela darba kien hemm raġel li...* (Well, there was once a man who... ) [No. XX]; (b) *Kien hemm żewġt ahwa, wiehed...* (There were two brothers, one... ) [No. XXI]; (c) *Mela darba wahda kien hemm żewġt ahwa: wiehed fiqir u...* (Well, once upon a time there were two brothers: one poor and
There was once a king who had three children. (There was once an old man, and he had three sons...)

The following opening sentences fall under heading (ii): (a) Meta Salamon kien tifel oħtu kienet tinsab f'art... (b) Għadda żmien bi żmien; dak li kien johghod it-tifel qal lis-sultan (c) ls-sultan rama bandu li min jagħmel xini f'art ġħandu tiřla jżewwiqbielu (The Sultan issued a proclamation that he who would make a land-ship would have his [the Sultan’s] daughter in marriage)

It is clear from the above that the most common formula is that containing the words kien hemm wieħed (rajel, Sultan, etc.). This clause opens up a line of fruitful comparative study. It immediately recalls the opening formulas of various tales collected from many countries of the Arabic-speaking world. J. Oestrup says that in modern Arabic tales la plus fréquente [formule de commencement], surtout en Égypt, est la phrase solennelle: Kān fīh wāḥid, mots qui ont pour l'oreille des Orientaux le même timbre fantastique et merveilleux que pour nous autres les paroles: 'Il était une fois —'. Toute une foule d'idées et d'images variées et attrayantes se présentent par le son de ces paroles, elles sont le 'Sesam, ouvre-toi', la formule mystérieuse qui nous laisse entrer dans le royaume ensoleillé des fées et des génies. This is borne out by a perusal of Spitta-Bey’s Contes Arabes Modernes in which eleven out of the twelve tales recorded begin with the formula Kān fyh wāḥid. From San'a' (Yemen), the nine tales collected by Rossi begin with the words Kān biḥ (māreb, 'aṣṣarab, wāḥid, ṭāğgāl, etc.). Kān be-rāţel is the opening formula of two tales from Djidjelli (Algeria) given by Philippe Marçais, while G. Colin’s tales in Moroccan Arabic and Socin-Stumme’s tales from Houara (Morocco) start with the formula kān (or kānt) wāḥd...

We have here unmistakable evidence pointing to the Semitic origin of Maltese narrative technique. This is furthermore borne out by the North

Oestrup, J., Contes de Damas. Leyde, 1897, p. 7. Oestrup adds that the formula kān ma kān is commonly used at the beginning of Syrian tales. This opening formula can be traced in the initial line of a Maltese rhyme, Darba kien ma kien, collected from Imdina, in Malta, and published by H. Stumme, Maltesische Studien. Leipzig, 1904, B 37, p. 67.

African meaning of Ar. "darba" in the sense of 'fois' recorded by Beaussier and Kazimirski.

Closing Formulas

Both Ilg and Stumme in their collections paid special attention to this aspect of the technique of story telling. They both declared in their introductions that they were stimulated to do so by a publication on formular closings in fairy tales which was published a few years before they worked on the Maltese material, namely Robert Petsch, _Formelhaften Schlusse im Volksmärchen_. Magri was apparently unaware of this publication but nevertheless it is possible to glean some interesting material under this heading from his tales.

The following are the main types of closing in Magri's collection:

(i) Exclamatory or interrogatory sentences; Exx.

(a) *l-immiegex tibla' l-brieqex, kemm int bla melh*! (lit. May the striped sparus swallow up the learned rock-fish! How lacking in salt you are! Salt = wit, good sense) [No. XX];

(b) *Bahnan li int! Ma rajtx li dawk huma x-xhus? Ghax maqdarhom!*? (You big fool! Didn't you notice those were the months? Why did you revile them?) [No. XXIV];

(ii) Lesson or moral drawn from the story: Exx.

(a) *minn dak inbarr koliox beda jmur barir u f'qasir zmien gie f'tieghu* (Since then everything went smoothly and in a short time he recovered) [No. XXI];

(b) *il-bidur b'areg 'il missieru mill-ghar u minn dak inbarr hadd f'Malta ma ghalaq iktar fil-gheken 'il missieru u il ommu hajjen* (The peasant brought his father out of the cave and since then no one in Malta shut up his father and mother in the caves while still alive) [No. XXII];

(c) *ghax sewwa jgbidu: Kull ma jiddi u jleqq mbux dejjem debeb* (because it is well said: Not all that glitters is gold!) [No. XXIII];

(iii) Punishments and rewards to villains and/or heroes of story: Exx.

(a) *Dabaal id-dar, sakkar il-biek bil-mustieb, u beda jaghti juq il-mara u t-tabib sakemm baghathom id-dinja l-obira* (He went in, locked the door and began to beat his wife and the doctor till he sent them to the other world) [No. VI];

(b) *lx-Xebba tal-Ĝmiel qalet lis-Sultan: Int issir kelb, dak ta' wrajk isir qattus, u dak it-tifel niebdu b'ghar-rus tieghi* (The Lady of Beauty told the Sultan: You will become a dog, the one next to you becomes a cat, and that young man I'll take for a husband) [No. VII.v];

(c) *Biex ix-xibà li ġhalqitba hemma ti qì mhallsa, qaxxriba u l-ġild taghba ghamlub hasira*

Professor J. Aquilina: personal communication on 15 November, 1958.

ghall-bieb (So that the hag who shut her up be punished, she was skinned and her skin was turned into a door-mat) [No. VIII]; (d) ... taw in-naru bdew jiżnu u jdoqqu l-platti madwar il-giignant sakemm inharaq u ntemm ġewwa (They set fire and began to dance and play on the plates round the giant till he was burned and consumed by the fire) [No. XV.i]; (e) ... Lill-obrajn is-Sultan stagħnibom (The Sultan enriched the others) [No. X.ii] (f) Imbagħad għamlu tmint ijiem festi għat-tieix dejjem għal qalbbom (Then they celebrated a week of festivities and lived happily ever after) [No. XII, var.].

(iv) Other characteristic formulaic endings: Exx. (a) U sar it-tieg ġu għammr u tghammru u spiċċaw (And the wedding took place, they lived together, had children and the story is finished!) [No. XXVI]; (b) U għammru u tghammru u spiċċat! (They lived together, had children and the story is finished!) [No. XII]; (c) U kulhadd mar għal xogħlu (And everyone went on his own) [No. X]; (d) U baqa' billi ħa (And he was left with what he had taken) [No. XXVII]; (e) U nfiardu bis-sliema (And they separated amicably) [No. XIV]; (f) U sieċ cċief j u kielu (And the petrel came and ate him up) [No. XVIII].

Of the formulaic endings given by Stumme the following are examples that do not appear in any of Magri’s tales: (a) Tombi tombi u spediet/ Kwart sapun erba’ habbiet’ (It’s over, it’s over and done/a quarter of a rotolo of soap is worth four grains!) [Stumme, No. X]; (b) Tambo tambo u spidiet/ u kulhadd imur mal-wied! (It’s over, it’s over and done/And let everyone go away with the torrent!) [Stumme, No. XX]; (c) Wiz żwiemel tax-xama’/ U h.s., a j’wiċċ min qal u sama’ (And the horses are of wax/And to hell with those who have told and heard) [Stumme, No. XV].

Also missing, from both Magri’s and Stumme’s collections, are the ‘if-so’ style endings given by Ilg, of which the following translations are examples: (a) ‘And unless they have died, they are still alive’ [Ilg, No. 22]; (b) ‘unless he founded an empire and lives still, this is a sign that he has not yet died’ [Ilg, No. 8]; (c) ‘unless they separated they look into each other’s eyes even today’ [Ilg, No. 132].

The following examples of Arabic and Sicilian closing formulas offer scope for the study of differences of stylistic presentation:

Djidjelli (Algeria)

(i) ... u mārtu m-meskīna šārbet ġq-ğhewa b-la-sękkeř (et sa malheureuse épouse but son petit café sans sucre) [Marcais, No. 1];
(ii) w-āl-ḥrāṣa rāḥet ħrej-kbejā u-āna žit ttreq-treq (Le conte, tout brulé, s’en est allé. Moi, promptement, suis arrivé). [Marcais, No. 2];
(iii) žāt ħn-nāma, żābdētiu u-klātu (La panthère l‘attrapa et le mangea) [Marcais, No. 4].
San’ā‘ (Yemen)

(i) ḥaḍā ḥaẓānā wal-lāyl ǧānā (Questo abbiamo raccontato e la notte (ci) è arrivata) [Rossi, No. 4];
(ii) Māḏāḏ sā‘ah talāmānū ū-wuga ‘at mārātah, mārāt āz-zamān, lā šabr ū-lā ʿtamān (Allora si riunirono ed essa diventò sua moglie, moglie del tempo (durevole) non di un mese o di una settimana) [Rossi, No. 5];
(iii) Lāw būṭyānā gartb, Ū-ma‘ānā zāḥib, la-nāddāt lokum ǧuṭā zāḥib wūlā tāmr nāgānī. (Se la nostra casa fosse vicina E avessimo dello zibibbo, Vi daremmo un paniere di zibibbo Oppure di datteri del Nagran) [Rossi, No. 7]
(iv)... ʷrāḥu lohām wal-yahūdi ma zīd ǧē (e se ne andarono e l’Ebreo non venne più) [Rossi, No. 8];
(v)... ʾin sadagnā, fās-sādīg Allāh; (Se abbiamo detto la verità, io u-ʾīn kāḏābna, fa-ʿālāyyna la veritiero e Iddio; se abbiamo mentito, ʾnaṭ Allāh. su di noi sia la maledizione di Dio). [Rossi, No. 9]

Egypt

The following are some of the idioms, expressions and sentences that occur in Pitrè’s above quoted Sicilian tales and which are found, on analysis, to have influenced the narrative style of the Maltese people. They may be matched by almost literal correspondences not only in
Maltese folk-narrative but also in everyday conversation.

Vocabulary

The vocabulary of Fr. Magri’s tales is predominantly Semitic. This is as it should be, considering that Magri collected his tales mostly from the villages of Malta and Gozo, where the speech is less contaminated than in the cities. His efforts to portray the old manner of speech may have also helped somewhat in this direction.

Magri’s texts make no appreciable addition to the Semitic Maltese lexicon. Most of the words making up the tales are still in current use; others are obsolescent, while a few are definitely archaic and provide material for interesting philological parallels, as may be seen from the notes provided by Professor J. Aquilina in a joint article published in 1957.14

In the Semitic section are listed (1) a few words or meanings given by Magri that are not recorded in Vassalli’s, Falzon’s and Caruana’s dictionaries15 – though few in number, they provide an interesting addition to the known Semitic lexicon of Maltese; and (2) some of the lesser-known words and a few unrecorded secondary meanings with an indication, whenever possible, how the word has been replaced nowadays by a word of Romance origin or, sometimes, by another Semitic word.

For our purposes, the Romance section enables us to deal with the lexical material from a fresh angle. In view of Magri’s avowed intention to reduce as much as possible the non-Semitic element in the vocabulary of his tales, it is surprising to find that the number of Romance words that occur in his texts runs to quite a considerable figure. This shows (a) that by 1900 the tales had suffered considerable change in the process of oral transmission and the informants freely used words of Romance origin that had come to form part of everyday speech, and (b) that in practice Fr. Magri only tampered with the text to a very small degree, and in any case not as much as one would think on reading his statement on page 87.

The 278 words listed under Romance Maltese, most of them of Sicilian or Italian origin, with a sprinkling of words derived from French, Spanish or English, have been classified under the following headings:

(i) Words recorded by Magri but not in Maltese dictionaries. 46 words are listed here, forming an important addition to the known Romance ele-

15Vassalli, M.A., Lexicon Melitense-Latinum-Italianum, Romae, 1796; Falzon, G.B., Dizionario Maltese-Italiano-Inglese, Malta, 1845, 2nd ed. 1882; Caruana, A.E., Vocabolario della lingua Maltese, Malta, 1903.
ment of Maltese. They represent Fr. Magri’s contribution to the Maltese Lexicon. The words have been checked not only with Vassalli’s, Caruana’s and Falzon’s dictionaries, but also with Busuttil’s Maltese-English Dictionary Dizjnnariu mill Malti ghall Inglis, first published in 1900, that is when Magri had already started collecting his tales. Most of the words are still in current use; others, like illuqqa ‘to vomit’, ulab ‘he hailed, called him’ and immarinaha ‘he deceived, tricked her’ are peculiar to Maltese folk-tales and are rarely, if ever, used outside their folk-tale context.

(iii) Romance words in Magri’s tales recorded by Busuttil only. Busuttil was Magri’s contemporary and the 23 words listed under this heading show that he had gained everyday speech currency, and were also deemed to possess lexical value. Here again one notices various words in common use that were not recorded by Falzon (1st ed. 1845, 2nd ed. 1882), examples being anglu ‘angel’, gardinar ‘gardener’, karru ‘chariot’, manku ‘a handle’, salt ‘assault, blow’, skud ‘one scudo, equivalent to 1/8’, torri ‘tower’, xkafja ‘shelf’, etc. A careful checking and comparison of Falzon’s and Busuttil’s dictionaries should reveal the extent of the lexical material recorded for the first time by the latter and also make it possible to make a fair appreciation of his work in this field.16

16 J. Wignacourt’s The Odd Man in Malta (London, 1914) contains a chapter (pp. 44-58) devoted to a caustic review of Busuttil’s Dictionary. A more serious evaluation of Busuttil’s work, however, is called for.
Words recorded by Falzon but not in Vassalli. Falzon has long been regarded as the best printed source for the Romance element of the Maltese vocabulary. The 144 words included under this heading show the extent to which the Maltese lexicon had been influenced by outside sources since Vassalli’s time, although it is safe to state that many more Romance words had crept into Maltese by the 18th Century than were actually recorded by Vassalli, as may be seen from a perusal of Agius De Soldanis’s Ms. dictionary at the Royal Malta Library. Only 20 years separated the issue of the second edition of Falzon’s dictionary from the first tales published by Fr. Magri. Falzon may therefore be considered a safe check for the freshness of the language used by Magri’s informants and it is significant that this section provides by far the largest number of words.

The references, in Roman letters, bracketed after each word in the following lists, are to the titles of the tales given at the beginning of this study; the Arabic numerals refer to the pages on which the words occur in the particular publication under reference.

**SEMITIC WORDS**

**WORDS OR MEANINGS UNRECORDED IN MALTESE DICTIONARIES**

**Dwiel** (XVI, 13) plural of dejl ‘skirt, short chemise’. Djuļ, given in the Maltese dictionaries, is the regular plural form, dwiel being the irregular plural figuring only in the text of this folk-tale.

**Iekol magħna** (XXIV, 90) ‘eat with us’. Outside folklore kul magħna is used by adults, iekol being only used by children, who likewise say iebu ‘take’, the adult imperative form in common use being ġbu. These

17R.M.L. Ms. 143a: Damma tal Kliem Kartaginis mscerred fel jom tal Maltin u Ghaucin...
forms are built by analogy with \textit{ieqaf} 'stop', and it is found on analysis that the form is only taken by verbs that are irregular and with \textit{w} as first radical (weak), e.g. \textit{(w)akal} 'he ate', \textit{waqaf} 'he stopped' and \textit{(w)ahad} 'he took'. \textit{Kul} and \textit{hu} were probably developed later, as \textit{iekol} and \textit{iebu} are the correct forms required by Maltese grammar in building the Imperfect Tense, which is formed by prefixing \textit{n} to the Imperative, e.g. \textit{n+iekol} = \textit{niekol} 'I eat', \textit{n+iebu} = \textit{niebu} 'I take'.

\textbf{lewlieni} (XXIV, 87) occurs in the text of a weather proverb given in the tale

\begin{quote}
Meta Jannar tarah lewlieni
Ma tarax il-bidwi tant hieni.
\end{quote}

i.e., 'when January is full of rain the farmer doesn't look so happy'. Magri explains the word \textit{lewlieni} in a footnote as 'that fills with rain (ilewwem), for it drowns everyone in its waters'. According to this explanation, the word should read \textit{lewliemi} and not \textit{lewlieni}. \textit{Lewlieni} is not given in any Maltese dictionary.

\textbf{Mohgaga}, in the formula \textit{baqa mohgaga} (XXVI, 113) recited by Maltese children when playing at riddles, meaning 'thing the meaning of which is disputed, a riddle'. This word is not given in the Maltese dictionaries. For etymology see Aquilina's explanation (op.cit., p. 15).

\textbf{mebda} (VI, 37) 'nobody', more commonly \textit{l-ebda}, is not recorded in Maltese dictionaries. \textit{Eبدا} is always used as an adjective preceding a noun, e.g. \textit{ebda bniedem} 'no man'. In the present context it is used adverbially in the sense of \textit{qatt} 'never' in a rhyme on the \textit{Bufies} tale,

\begin{quote}
Hanini mar Bugibda
Imnejn ma jigi mebda
\end{quote}

i.e., 'my husband (dear) has gone to Bugibda / whence he will never return'. \textit{Mebda} is made up of preformative \textit{m} reduced from \textit{ma+ebda} 'no one', which is always used in conjunction with a number, e.g. \textit{ebda wiehed} 'no one' or with a noun with or without an article, e.g. \textit{ebda bniedem} or \textit{l-ebda bniedem} 'no man'. This form with preformative \textit{m} is rare in Maltese (see Aquilina, op.cit. p. 25).

\textbf{Ghulija} (XV, ix, 37) invariably occurs with \textit{ggant} as \textit{Ggant Ghulija} in Maltese folk-tales. This leads one to suspect a direct Biblical influence through the David and Goliath (M. \textit{Gulija}) story, with which this and other Maltese tales share several motifs. \textit{Nanna Ghula} figures as a wicked old hag in a few tales not included in Magri's collection. Magri explains in a note (p. 44) that \textit{ggant Ghulija} is identical with the Lebanese \textit{Ghul}, a devilish spirit that devoured people. \textit{Ghul} is explained as 'desert wild beast' by Caruana. The suggestion is here made that \textit{Ghulija} may have supplanted the older \textit{ghul} under the influence of
the Biblical story when ghul became less known.

Qrajna (XV.xii, 58) fem. diminutive of qarn 'horn'. Falzon and Vassalli give qrajjen, masc. diminutive. The feminine form, which is not recorded in dictionaries, may be doubly diminutive qrajjen + a, as the feminine ending in Maltese is often used in that sense.

Rassas (XV.xii, 63) pres. part. of rassas 'he crowded'. The meaning required by the context is 'pursuer' - ghax ikollì r-rassas urajja, 'for my pursuer will be hard behind me'.

Sandar (XV.x, 45) occurs in the tale as imorru ghas-sandar, which Magri explains as 'they go out to steal'. The word sandar recorded in M. dictionaries has a different meaning. In everyday use one hears qata' sandar in the sense of 'he was lucky', which meaning of luck or success could be stretched to apply to luck in robbery, etc.

**UNUSUAL WORDS OCCURRING IN MALTESE FOLK-TALES**

Bagbieqa (XII, 60) 'a pitcher or pot for water' (Falzon). The word is also given by Vassalli and Caruana.

Baqqi (XXIV, 84) imperative from baqqa, 'he watered or irrigated', mostly used in the idiom issaqqi u tbaqqi 'to water repeatedly' in M. folklore. The word occurs only in Caruana's dictionary.

Bassarin (X.ii, 28) pl. of bassàr 'prophet, a diviner, a guesser' (Falzon). Nowadays the word is largely replaced by profeti < It. profeti.

Bikkmu (XVI, 11) 'he silenced him', made up of bikkem 'he made (one) dumb' + u, 3rd pers. masc. pron. suffix. In everyday speech the sense is more commonly expressed by the word sikkutu, from sikket 'he silenced'.

Duwa (IX, 7) 'physic, medicine' (Falzon), nowadays largely replaced by mistura 'mixture' or medicina < It. medicina. Its derived verbal form dewwa, ide wwi 'to cure, to medicate' is still used.

Dwiemes (XXII, 26) pl. of demus, explained by Falzon, following Vassalli, as 'a sepulchral vault in which, it is said, the Maltese anciently buried their decrepit relations when in a state of dotage'. Caruana and Vassalli give the following proverb in which the word occurs:

Kien ilbierah, kien lewliemes, He was yesterday, he was the day before yesterday. But today he lies in the grave.

Gergha (XII, 54) noun of unity from ġera 'he digested, swallowed up at one draught', used in the tale in conjunction with second derived form ġera in the phrase kont inġerrghék ġergha 'I would have swallowed you at one gulp'. This second form is still used both in its original sense 'to digest', as in dan l-ikel ma nġerrghux 'I can't digest this food', and in its figurative sense 'to stand (a person)', as in dak il-
bniedem ma nqerghux 'I can’t stand that fellow'.

Gorf (VII.v, 51) 'a very tall man, a giant', said of a strong person. Exx. qisek gorf 'you look like a giant', sar donnu gorf, 'he became like a giant', fhe daqs gorf 'he is as tall as a giant'. Cpf. golfu, figuring in another tale (see Romance section, p. 105)

Hâtem (XXVI, 114) 'a seal, a ring', nowadays largely replaced by curkett < It. cerchietto'. The word, however, survives in the phrase il-hâtem tal-qarnita, a ring with the image of an octopus used to cure a person suffering from pterygium.

Inniedu (XXV, 107) imperfect tense of nieda, 'he proclaimed, published'. Nowadays the use of this word in common speech is restricted to the proclamation of the marriage banns. Over the past quarter of a century there has been a revival of the word in literary circles, e.g. inniedu konkors 'we announce a competition'.

Jamar (XXII, 27) 'he commands, orders' nowadays largely replaced by Romance word jordna < It. or Sic. ordina, but still occasionally heard in the expression Kallajamar 'God willing'.

Jekile (XXIII, 48) 'otherwise, or else'. This word is nowadays restricted to literary use, its place in common parlance being taken by inkella with same meaning. For etymology see Aquilina (op. cit. p. 17 under inkellé)

Jomm (XXIV, 85) for jà omm 'o mother' is still heard in country districts. Otherwise ma, short for mamma 'mother', heard in baby language, is used instead for general purposes.

Kies (VII.v, 51) 'a glass, a drinking glass'. Falzon gives the expression, given also by Vassalli, sqieb kies b-imrar 'he has made him drink of the cup of bitterness', and adds kies tat-tqarbin 'pyx, box in which the consecrated Host is kept in Roman Catholic countries'. R.M. tazza has now largely replaced S.M. kies (pl. kjes) in the sense of 'glass'.

Kus (XI, 53) 'a jug, or oil pot'. Nowadays the word survives mostly in the saying iddendiž kusek f'bieb l-imghallag, lit. 'do not hang your oil pot at the door of the hanged man's relatives'; or iddendiž kusek mieghu'i.e. 'do not provoke any trouble with him', lit. 'don't hang your oil pot on him'.

Maqdes (VII.v, 48) Only Caruana gives this word, as maqdes 'luogo di santità, santuario'. Magri uses the word between inverted commas 'maqdes', which he explains as 'a small building for worship; if it belonged to Catholics, today we would call it kappella 'chapel' or oratorju 'oratory'. The word has since passed into literary use in the generic sense of 'church, place of worship', but it has not gained currency outside literature.
Mewwija (XII, 53) ‘inhabited, full’. Caruana and Falzon write this word with an N, i.e. Newwija, while Vassalli gives both forms, Mewwija and Newwija (p. 626, s. v. Xaghra). All three dictionaries record the word as a place-name, alone or as Xagret Mewwija, denoting a portion of the site where Valletta is built. In a long note, Fr. Magri (p. 67) says that the word is often corrupted to milwija ‘twisted’, but his informant, who would have been 115 years old at the time of publication of the tale in question, always used mewwija. The meaning of ‘inhabited’ fits in with the sense required by the tale, as each of the seven citrons had a girl inside. Abela in his Descrittione di Malta (1664) wrongly explains Mewwija in place-name Xagret Mewwija as an Arab’s name. He records the saying, which Magri reproduces in his note, Xagret Mewwija ghad ji ji zaman (sic) li kull xiber jiswa mija ‘On the plain Mewwija a time will come when each span (of land) will be worth a hundred’ – a sort of prophecy attributed to the Saint Corrado who, according to tradition, had been forced to leave Malta by the intrigues of the people of Mosta.

Mindil (XXIV, 85) As used in Magri’s tale, mindil tal-hobż, the word means ‘a napkin’, but outside this context it may also mean ‘the omentum’. For etymology see Aquilina (op. cit., p. 33). The word servietta < Fr. serviette, has replaced mindil in Modern Maltese in this sense.

Miżrukin (XVI, 17) The word occurs in the tale in the expression miżrukin bil-ferb. Magri explains in a note (p. 34): ‘This word is not heard nowadays, except in the nickname Ta’ Żerrek and in the name It-Tieqa żŻerka. Żerek or Żarak, jiżrek means ‘he filled, to fill’, hence miżrukin bil-ferb means ‘filled with happiness’. Of the M. dictionaries only Vassalli gives żiżrek, jiżrek, but in the sense ‘ad Venerem incito, pec. marem ad coitum venereum invitat femina’.

Mnieges (XX, 15) Magri writes innieghes, but Falzon gives mnieges, pl. of mingus ‘striped sparus’ (fish), which fits in with the sense required by the text, l-imnieges tibla’ l-brieqex, ‘May the striped sparus eat up the rockfish’. Caruana derives the word from nigża, and writes minguz, mniegeż.

Imrasi (XXI, 19) pl. of marsa ‘haven, sea-port, harbour, gulf or bajj’ (Falzon). The pl. form is given by Vassalli and Falzon, but not by Caruana. Apart from place-names, such as Marsa, Marsamxett, Marsalforn, Marsaxlokk, the word is no longer used, port or bajja being used instead.

Msselha (XV, 63) ‘broom’. Caruana does not give this word in his dictionary. Nowadays the word, still current in Gozo, in Malta is largely replaced by xkupa < It. scopo, or, in its more polite form, xija.

Għaġuż (XXII, 30) ‘decrepit, worn out with: age’ (Falzon). The word figures
as a family name, written Agius. The fem. form, ghajżuza, means both
‘lobster, sea fish’ and ‘decrepit old woman’, as in the proverb ghal-
bekk l-ghajżuza ma tridx tmut, ghax iktar ma tikber izjed tittgallem
‘that is why the decrepit old woman doesn’t want to die, because the
older she gets the wiser she becomes!’. Its denominative verbal form
għagżeż is still occasionally heard, as in iż-żmien iżgħagżeż ‘time
makes (one) grow old’. Otherwise the word has gone out of currency,
xib or xiba għakka being used with the same meaning. In M. folklore
we find the belief that the oldest woman living in the parish, called
l-Għażula, is thrown from the church steeple on Thursday, in the mid-
dle of Lent.

Gharas (XVI, 15) ‘nuptials, wedding’. This is the sense required by the
context u sar il-gharas u t-tieq. Only Vassalli gives this word, as a
plural form (sing. ghirs [ghars]) which he explains thus: ‘bozze, convito
o banchetto nuziale, accompagnato d’altrè allegrie, come di suoni,
balli, canti’. Nowadays tieq is used with the same meaning, but origi-

Gharem (XIV, 43) pl. of gharga ‘a heap of threshed or winnowed corn
etc.’ The word is still used by peasants.

Gharxa (XV, 47) m. aghrax ‘lame, cripple’. In Modern Maltese zopp
(f. zoppa) < It. zoppo, has gained general use, with its derivatives
izzoppja or izzappap ‘he grew lame’ and zappap ‘he limped’. Cf. It.
zoppicare.

Gheliem (XV, xii, 67) pl. of ghelm ‘sign, mark’. The verbal derivative is
still used, ghallem il-hobż ‘he marked the bread’.

Ghewar (XXIV, 84) pl. of ghaw, ‘shame’. The word is given in the same
in the proverb Fix-xita ta’ Fras jinkixfu l-egħwar ‘With the rains of Feb-
uary all secrets are out’ i.e. hidden roots sprout. For etymology see
Aquilina (op. cit., p. 21).

Ghwerib (XV, xvii, 73) pl. of ghareb ‘an angular stone used in building’
(Falzon). Vassalli does not give this word, which survives in the
building trade.

Qadib (XXIII, 45) ‘a rod or wand’, also ‘a branch, a twig’. Only Falzon
gives the pl. godbien. Hardly used today.

Qawqam (XXII, 27) The word occurs in the first line of the rhyme:

Ixtri l-qawqama u l-qawqam.

The sense required by the text is ‘cattle’. Vassalli gives this word
without, however, giving its meaning. Instead he notes that qawqam
is the form given by Agius, but he himself had heard qamqam. I have recently heard qawqiJ:m used in a version of the same tale by a 99-year-old woman at Taš-Salib, in the limits of Rabat, in Malta.

Qasam (XXIII, 44) 'a large tenure, estate, or possession' (Falzon). The Maltese historian Abela (1664) links this word with the introduction of the feudal system in Malta following the coming of the Normans in 1090. The island was parcelled out among the followers of Count Roger into estates (M. :qasam, pl. :qisma), which were then subdivided into raba' lit. 'fourth part', and enclosures (M. :ghalqa, pl. :eglieqi).

Qaligh (XXVI, 58) 'much, many, a great deal, abundance' (Falzon). The word is still used in Gozo. In Malta it is largely replaced by ħafna.

Rehna (XXII, 30) 'mercy'. The word occurs in the hortatory il-hniena u r-rehna tas-sultanî 'May I implore' the clemency and mercy of the sultan!' Vassalli says that in his day the word was very commonly used in prayers, such as Alla jaghti r-rehna u l-ğenna liina u lil qrabatna 'May God grant mercy and Heaven to us and our relatives'. Nowadays this word is hardly ever used, but it survives in its derived verbal form rahham 'he implored mercy'.

Serriegha (XV, viii, 35) 'a wrestling bout'. For etymology see Aquilina's explanation (op.cit., p. 21). In Modern Maltese 'he wrestled' is expressed by issara, but the sense of 'a wrestling bout' serriegha is lost.

Silf (XIV, 48) 'the husband of the wife's sister; the wife of the wife's brother; brother-in-law' (Falzon). The word is still used. The definition of brother-in-law (Falzon) or cognato (Vassalli) does not convey the exact relationship conveyed by silf (pl. :stjiefe).  

Swejda (XII, ii, 65) diminutive of :swedqa, fem. of :swebd 'black'. The word occurs in the following rhyme, placed in the mouth of the talking bird in the tale:

Girlingičlija — swejda Gharbijha,

Mnieher il-langasa — xufftejn il-lenbijha!

Only Vassalli gives this form swejjed, swejda 'neretto'. Caruana gives the word as the name of a little bird. 'Swejda is not heard nowadays outside Maltese Folklore'.

Trajbu (XI, 42) is used by Magri in the sense of 'little baby', as a diminutive form of :tarbija 'baby'. Vassalli, followed by Falzon, distinguishes between :trajbu 'a doll, a little girl's puppet or 'baby' and :trajbija, diminutive of :tarbija 'a little boy, baby or infant'. In an interesting note Vassalli records the very ancient Maltese custom of preparing rag dolls or puppets which children, especially girls, threw over the flames of the bonfire on St. John's Eve. Vassalli hints at a possible Phoeni-
cian influence, relating to the sacrifice of children to the Phoenician god Molok. He then gives details of the custom as surviving in his day: 'Oggi però questa superstiziosa cerimonia a variato di molto, ed i fanciulli sogliono farla nella vigilia di S. Giovanni Battista in occasione dei gran fuochi che si fanno. Ella al presente consiste nel passare per tre volte sul fuoco il fantoccio e fingendo di battezzarlo s'invoca il nome di S. Giovanni. Se mai caderà sul fuoco o intorno nel passarlo, allora si ripete la cerimonia'. The custom survived, in modified form, up to within living memory. The word trabu nowadays also denotes the lace pillow used in the manufacture of Malta lace.

Wadaf (XV, viii, 36) 'sling', is more commonly heard as wadab. For etymology see Aquilina's note (op.cit., p. 13). In Modern Maltese it has been replaced by Sic. sbandola.

Warranijiet (XV, xii, 71) or, more commonly, waranijiet 'backwards, back'. The word is still used, but it is being largely replaced by lura.

Xorka (XXIII, 44) pl. of xrik 'partner'. lxiurka is sometimes used instead of xorka. Caruana gives the proverb bormet ix-xorka qatt ma ssir sew-wa equivalent to Eng. 'too many cooks spoil the broth'.

ROMANCE WORDS

I. WORDS RECORDED BY MAGRI BUT NOT IN MALTESE DICTIONARIES

Annòta (XXVII, 147) 'year, yearly crop'; dialectal variation of annòta < Sic. and It. annata.

Bandu (XIII, 3) 'proclamation'. Cp. It. bando (DEI, xiii sec.) and Sic. ban-nu. Before and throughout the rule of the Knights (1530-1798), and for some years later, bandi were read by the town-criers (banditori). Here bandu 'a proclamation was issued', is still heard in some villages.

Barkata (XV, xviii, 73) a standard for measuring loads of roof- or floor-slabs. In the quarry trade, barkata refers to slabs only, meaning 'twelve slabs'. A more etymological meaning is 'boat-load', cp. It. barcata, Sic. varcata.

Basta (IX, 7) 'so long as, provided that', as in the present context basta nara 'l ommi mfejqa 'so long as I see my mother cured'. The meaning differs from that of Sic. basta 'verbo usato in forza di avverbio per imporre termine, basti, non piü' (Mort.) or of It. basta 'enough' (DEI).

In this Section the abbreviations Mort. and DEI are used to indicate the following dictionaries: Mortillaro, V., Nuovo Dizionario Siciliano-Italiano. Palermo, 1853, and Dizionario Etimologico Italiano, di Carlo Battisti e Giovanni Alessio, 5 vols. Firenze, 1950-57.
Baxx (XXIV, 83) in oqgħod baxx ‘sit down, be seated’, still used in Gozo. In Malta one is more likely to hear instead oqgħod bil-qiegħda, while oqgħod baxx means ‘Silence! Be quiet’. The M. sense here does not agree with that of Sic. bassu or It. basso.

Bravu (VI, 37) meaning (i) ‘well done; good’, as in bravu għalik and (ii) ‘intelligent, learned’ as in dak bravu hafla ‘that man is very learned’.

Bukkett (XIV, 43) ‘bunch of flowers’ < Fr. Bouquet.

Fatta (XVI, 7) ‘a sort of’, in common use, as in the expression bħal fatta ma ridtx ‘I sort of did not want’; also nies ta’ dīl-fatta ‘people of this sort’. The text of the tale requires the meaning ‘shaped like...’, i.e. fatta ta’ baqra, ‘shaped like a cow’. Cp. Sic. fatta ‘specie, sorta, genere, qualità, condizione’ (Mort.). The expression kif u x’fatta ‘how and in what manner’ is still current in the colloquial language.

Fond (XV.xi, 49) a household occupation for ladies, unspecified by Magri; Cf. It. fondo with different meaning.

Furmarija (XXIII, 47) ‘Infirmary’. The expression tabib tal-furmarija ‘infirmary (House) doctor’, may still be heard. The Hospital of the Knights of St. John was known as the Sagra Infurmeria, whence this word passed into Maltese. Cp. Sic. Nfurmarija ‘luogo o stanza dove si curano gli infermi’ (Mort).

Golfu (VII, 39) explained by Magri as ‘a bird that prowls by night, eats other birds, and, according to the beliefs of our forefathers, exerts extraordinary influence on human beings’. Magri tries to identify this bird with the white owl (M. barbageż), and, amongst other suggested derivations, he links up the M. word golfu with A. gufa, whence It. gufo, ‘uccello rapace notturno’ (DEI).

Gollanda (XV.xi, 49) like fond, (q.v.) left unexplained by Magri, but very likely stands for gollanda (dialectal form gortalanda). Cp. It. ghirlanda ‘garland’.

Grazzja (VIII, 56; XVI, 10) in ħa grazzja magħba ‘he had a liking for her; he was fond of her; he was in love with her’. This meaning is purely local and is neither It. nor Sic. grazia.

Gżatu (XVIII, 50) ‘she accused him’ < Sic. accusari, It. accusare.

Ġakkijiet (XVI, 8) pl. of ġakk < Eng. jack (mechanical term).

Ġibjeta (XV.ix, 39; VII.iv, 48) ‘a small cistern or tank’. A word in common
Gostra (XIV, 44) nowadays used in the sense of ‘greasy pole’ – a summer sports popular at seaside resorts on special occasions, such as the feast of the patron saint, etc. In its wider meaning, as in the tale where it occurs, it means ‘tournament, joust’. Cp. It. giostra, Sic. giuistra ‘l’armeggiar con lance a cavallo, correndo l’un cavaliere contro l’altro colla mìra di scavallarlo’ (Mort).

Iddubbaw (XV, xii, 54) ‘they obtained, they acquired’. The word iddobba has a variety of meanings: (i) he just managed e.g. kemm tiddobba ‘just enough’, (ii) you’ve had it, e.g. iddubba jtha, and (iii) it has passed into a proverb Budobba billi kellu addobba ‘Budobba (fictitious rhyme-name of person) had to make do with what he had!’ It. addobbare ‘to decorate, to furnish’ is far removed in meaning. Much closer is the Sic. addubbari ‘rimedio o riparo:... racconciare, ridurre, rimettere in buon essere le cose guaste’ (Mort).

Kumplament (XXIV, 90) ‘the remainder’. Falzon and Busuttil give only kompla ‘he accomplished’, he finished. Note the distinction between kumplament and kumpliment ‘compliment’. Cp. Sic. cumplimentu ‘complimento; cosa finita, assoluta, compimento’ (Mort).

Ikkorda (XVI, 9) ‘he came to an agreement’ Sic. accurari (Mort).

Ilugga (XIV, 50) used in the sense of ‘he vomited’, as explained by Magri. The Maltese word may derive from Sic. alluggiari ‘albergare’ with the meaning of its antonym sluggiari ‘dilogiare, abbandonare un’abitazione’ (Mort).

Imanwal (XV, xviii, 73) ‘he assists in masonry work, etc.’ Denominative verb from manwel ‘a mason’s labourer, a bricklayer’s man’ (Falzon), pl. mnawel, or mnowal (Vassalli). The verb form is not given in Maltese dictionaries. Cp. Sic. manuali ‘colui che serve al muratore’ (Mort).

Jimpesta (X, 23) ‘he sullies or dirties’, fig. ‘he badgers’ Sic. mpistari.

Lagrimanti (XI, 39) ‘weeping, tearful’, occurs only in the following rhyme:

Dragun Draganti, (O dragon dragon, I am Peter Jien huwa Pietru ‘the Tearful One; in the con-
Il-Lagrimanti, text ‘The Child of Tears’)

Immarinaha (XVI, 10) meaning ‘he deceived her’ according to Magri’s ex-
planation. The Maltese meaning is far removed from that of Sic. *ammarrinari* 'metter dell’aceto sul pesce fritto, o sopra altri cibi per conservarli' (Cp. M. *immarrinat*). For the idea of cheating. Cp. It. *marinare* (la scuola) 'to play truant'.

**Offri** (IX, 8) occurring in the tale as *toffri* 'to offer'. Cp. Sic. *offeriri*. It. *offrire*.

**Ola** (XIII, 5) 'hello! hi there!' and *ulab* 'he hailed him, called him'. Magri uses this word frequently in his tales. It looks like a direct borrowing from It. *ola*. The verb *ulab* 'he hailed or stopped him' seems to be a local formation. Cp. Sic. and It. *ola*.

**Pett** (XV, xvi, 73) a word used in the quarrying trade, < It. *petto*, Sic. *pettu*, but note that both words are unconnected with stone quarrying.

**Piena** (XV, 61) 'pain', < Sic. or It. *pena*.

**Pjatir** (XXIV, 85) 'pleasure; a good turn, a favour'. Cp. Sic. *piaciri*, It. *piacere*.

**Rkaptu** (XXII, 29; also XV, xii, 55) in *issib irkaptu* 'to find a way out; to solve, to remedy'. Outside this context it can also mean 'capital, equipment, means', as in *irid ikollok irkaptu ghal dak ix-xoghol* 'you have to be well equipped for that work'. Cp. Sic. *ricapitu* 'la materia da mettere in opera per gli oggetti di loro arte' (Mort).

**Serpentin** (X, 26) 'sea serpent' according to the context in which it occurs. *Serp* 'snake', *serpentin* 'sea serpent', *golfu* 'a prowling bird', *dragon* 'dragon' are among the mysterious animals that figure and often substitute one another in Maltese folk-tales. Cp. Sic. *sirpenti* 'serpe grande, serpente di mare' (Mort), It. *serpente*.

**Sittażbrilja** (XVIII, 43) Magri (ibid., pp. 59-62) explains that a proud man is called by this name, and the same epithet is given to one who instead of sleeping, spends the night watching, or who lives to a ripe old age and seems to have got the better of death. In Maltese beliefs the Sittażbrilja figures as a woman of great wisdom, the sister of Solomon, Samson and Job, and every thirty years she is rejuvenated and starts life again at 18; this will go on till the end of the world. Magri identifies her with the Moon, who watches by night, is rejuvenated every thirty days, and was the source of much wisdom in the past. The derivation of this word is obscure. Any connection with *settembria* 'autumn' (DEI)? Autumn could be associated with the three winds personified in the tale. Cf. also Ilg's study of M. *legend is-Settusibilla* (1914)

**Skarta** (XVIII, 43) occurring in the context *ir-rūb skartahom*, explained by Magri as 'the wind drove them on to the land'. Outside this context
skarta may mean 'to discard, to set aside, to reject' (Falzon) or 'to play truant' as in tiskarta liskola, with which cp. It. scartare and Sic. scartari. The Maltese sense in the tale may be remotely connected with that of Sic. scortari 'guidare' (Mort), It. scortare 'to escort'.

Temp (XIII, 5) 'in ragel ta temp 'advanced in years'. Cp. It. attempato.

Nitrtradik (IX, 11) 'I betray you'. Busuttil gives verbal noun tradiment only, meaning 'treachery, breach of faith, fidelity or trust'. He also gives an interesting extension of this meaning, in l-ixkubetta kienet fuq it-tradiment 'the gun was at full cock'. Cp. Sic. tradiri, It. tradire.

Tratt (XV, xvii, 73) used in the quarry trade. The meaning of It. tratto, or Sic. trattu 'spazio, distanza' (Mort) has no connection with quarrying.

Itturufnat (XV, i, 60) 'exiled'. Romance Past Participle from Sem. tarfien 'exile'. Busuttil records the word in explaining tarraf, but omits it in the main sequence of his dictionary. One also hears sometimes turufnament 'exile'.
