OpenAIRE and the Alignment of European Open Access Policies

Pedro Principe
University of Minho

www.openaire.eu

OpenAIRE implements the

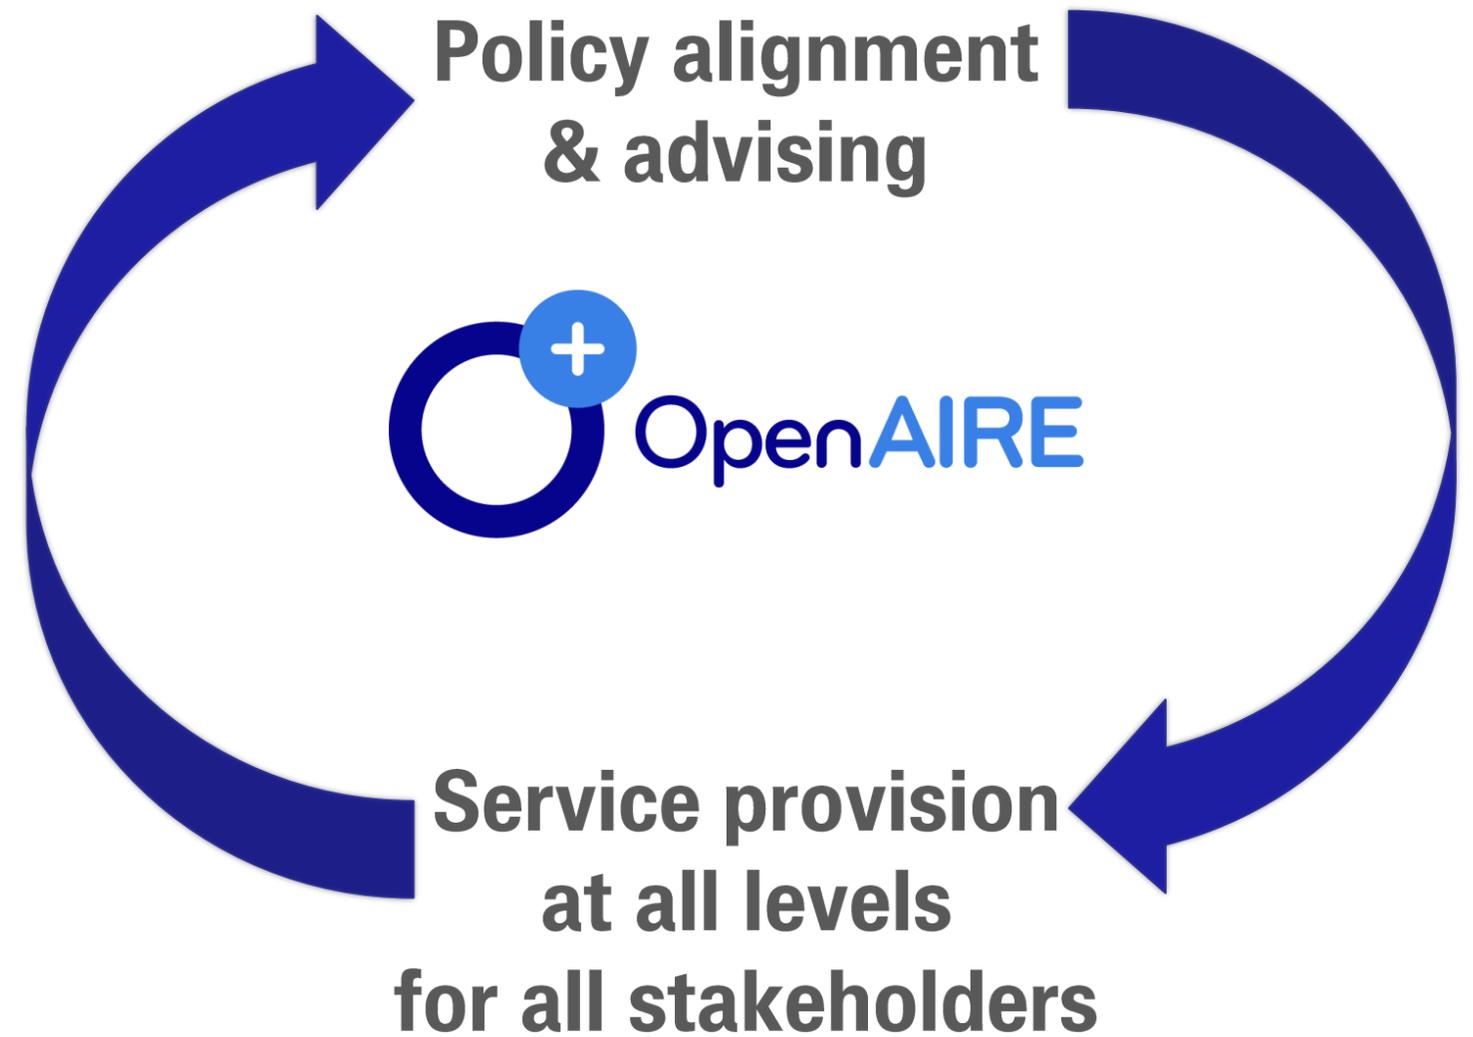

OPEN ACCESS & OPEN DATA

· EC requirements

· & supports OA policy alignment in Europe

OA is here to stay.
Policies and practices
hand in hand for a
sustainable OA

Who we are

- **In 24x7 operation since Dec 2010**
- **EC funding (2009-2020)**
 - OpenAIRE (2009-2012)
 - OpenAIREplus (2012-2014)
 - OpenAIRE2020 (2015-2018)
 - OpenAIRE Advance (2018-2020)
- **Consortium of 50+ partners**
- **A legal entity in 2018**

OpenAIRE: what we do

Support – Accelerate – Monitor Open Science

Implement and align Open Science policies across Europe and the world

Foster innovation for added value services based on open research

Train for Open Science

Deploy services to embed Open Science into researcher daily workflows

Build global common standards for linking and contextualizing all research

Monitor Open Science in Europe

Two faceted e-Infrastructure

Human Network

34 expert nodes all over

Europe: Open Science training & support, OA policy alignment, Technical assistance...

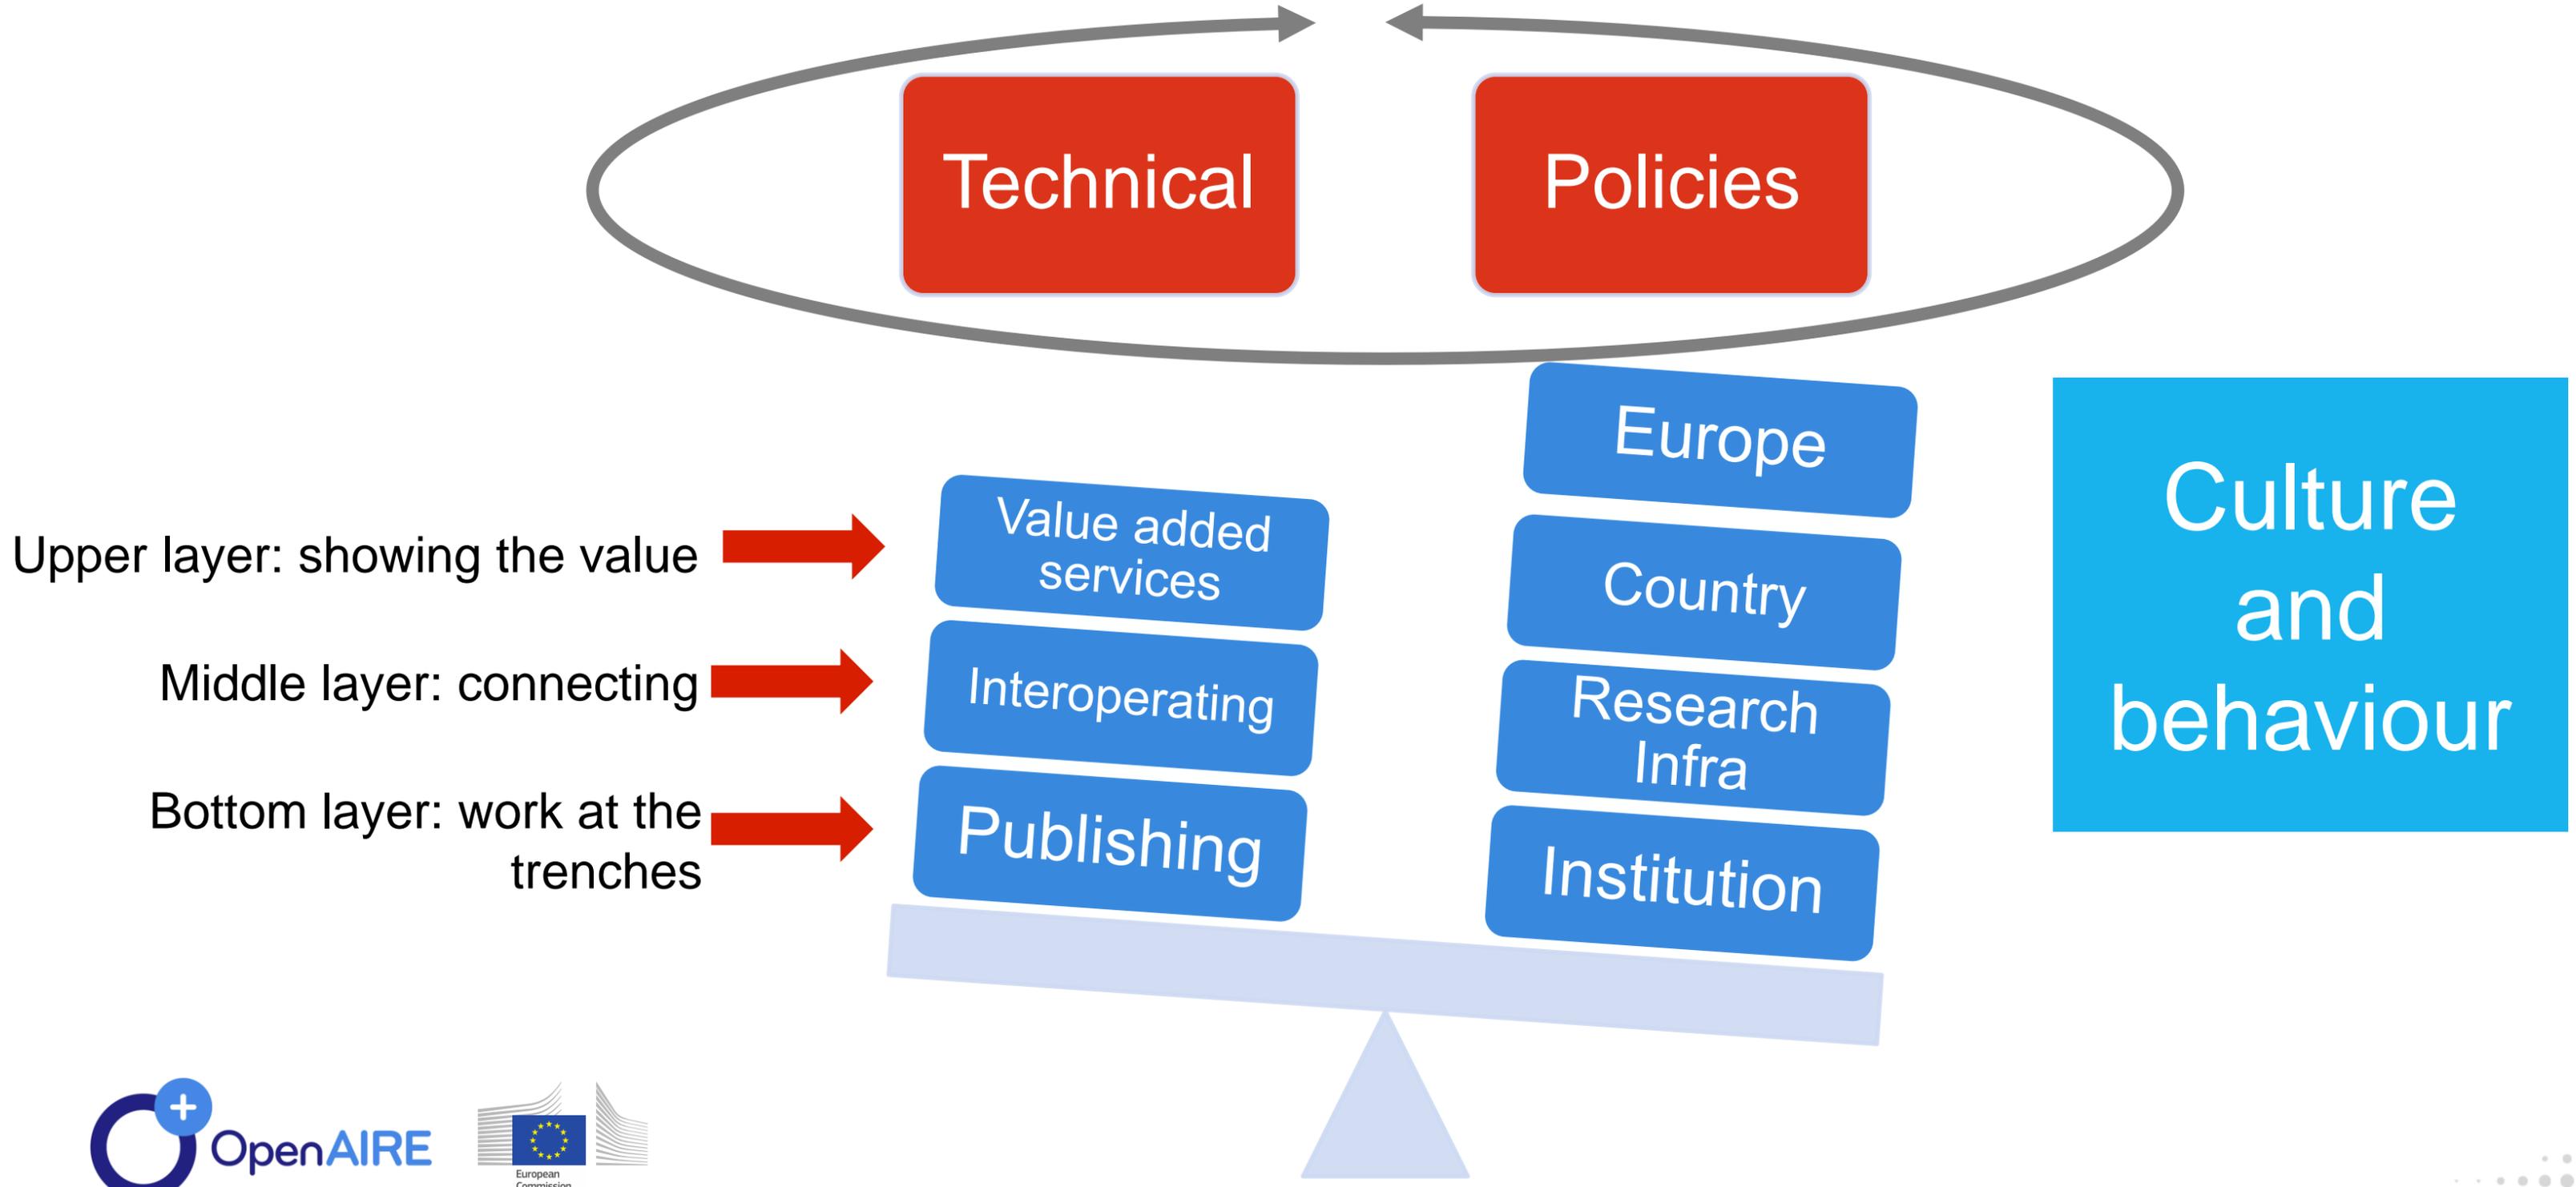

Integrated Scientific Information

System with access to: 23,163,698 publications; 616,224 datasets; 1,028 data providers, 800K publications linked to projects from 15 funders

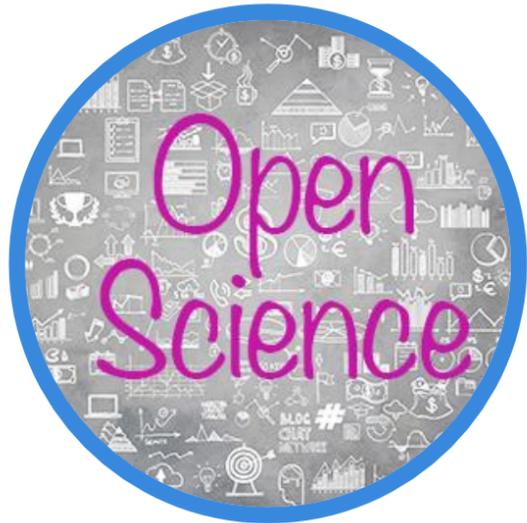

Digital Network

Working at different levels of the research ecosystem

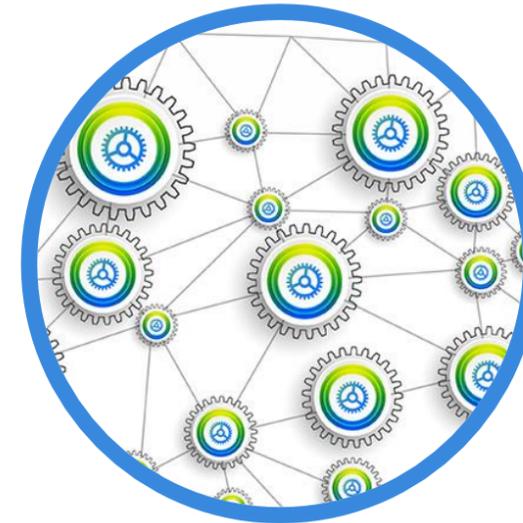

Open Science services for all

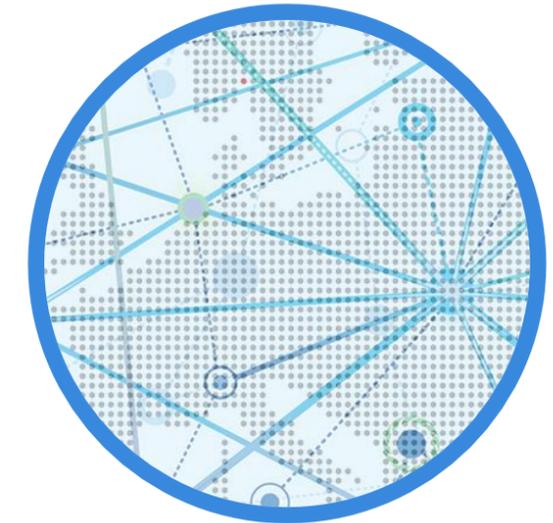

**RESEARCHERS &
RESEARCH
COMMUNITIES**

**CONTENT
PROVIDERS
MANAGERS**

**FUNDERS &
RESEARCH
ADMINISTRATORS**

**3rd party
SERVICE
PROVIDERS**

Services at all levels of e-Infrastructure.
Services that cover all research life-cycle.

Dashboards for funders, content providers,
research communities and institutions.

Open Access is the
DEFAULT

for research results in H2020

10 years to become open

Open Access requirements and who is covered by them?

All beneficiaries of H2020 funding must provide open access (free of charge, online access for any user) to all peer-reviewed publications by **depositing them into a repository**

http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/amqa/h2020-amqa_en.pdf

H2020 Open Access Mandate

HOW IT WORKS

Open Research Data in H2020

Multi-beneficiary General Model Grant Agreement

- **29.2 Open access to scientific publications**
- **29.3 Open access to research data**

OpenAIRE goal

Place Open Science in the agenda of every funder or research performing organization in a tangible manner

RECOMMENDATIONS

COMMISSION RECOMMENDATION

of 17 July 2012

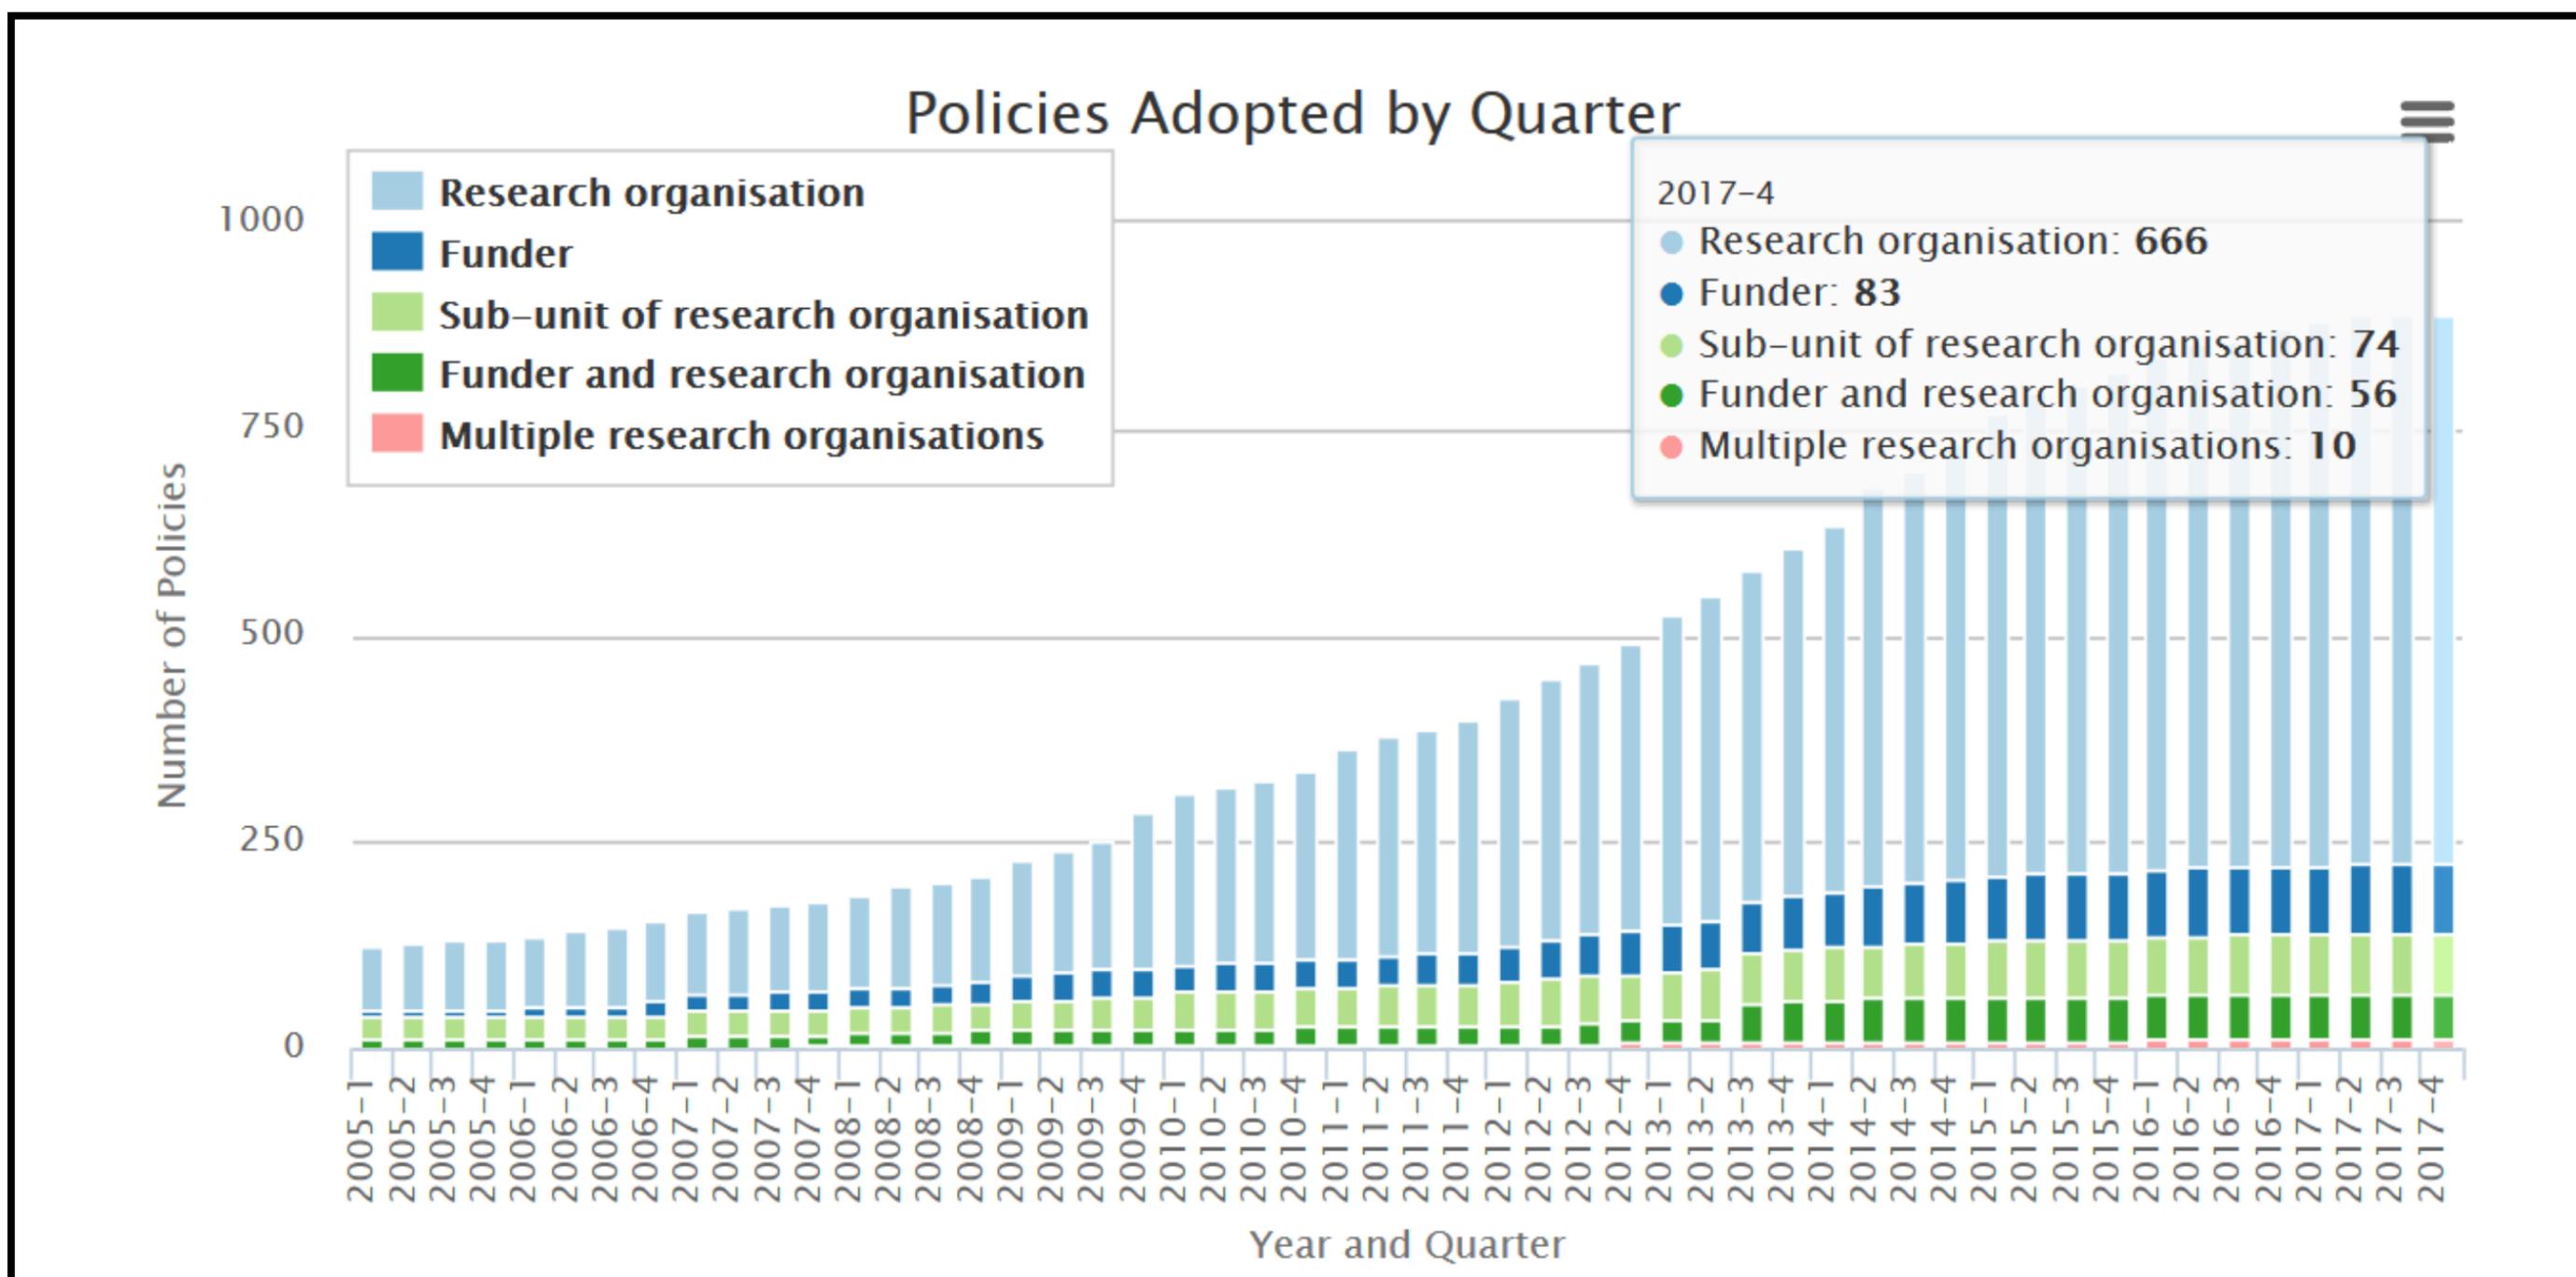

on access to and preservation of scientific information

(2012/417/EU)

OpenAIRE network supports the aim of encouraging the development of matching policies on Open Access and Open Data in the European Union, according to the European Commission's Recommendation on "Access to and preservation of scientific information" (July 2012) and in view of maximizing alignment with the Horizon 2020 policy on access to the research funded by the Commission.

Why do Institutions & funders define OA and OD policies?

Why do funders define OA and OD policies?

Better science!

**Improved monitoring
and transparency of the
results of funding.**

**Higher visibility and
impact from their funding
in research and society in
general.**

**Maximized return on
investment.**

Content

**Definition and
Implementation
Process**

Monitoring

What elements make successful Open Access, Open Data, Open Science policies and How to design them?

Results of the policy analysis assessment

- ROARMAP content measured
- 122 mandatory policies (institutions)
- Regression analysis carried out using policy criteria

Condition	Correlation with deposit rate
Must deposit	✓
Cannot waive deposit	✓
Must make item OA	✓
Cannot waive making item OA	✓
Link deposit with research assessment / evaluation	✓
Cannot waive retention of rights	✓

Data: Report on policy recording exercise: <http://goo.gl/AI03ET>

PASTEUR4OA

A list of important policy criteria

- Must make deposit Open Access
- Cannot waive making item Open Access
- Where rights are retained, this cannot be waived
- **Must deposit ✓**
- **Cannot waive deposit ✓**
- **Linked to research evaluation ✓**

✓ Significant correlations with deposit rate

Monitor Open Science Policies – why and how?

Monitoring policy compliance is important because it enables policy makers to:

- i. assess which authors are **adhering to the policy**;
- ii. decide whether additional advocacy practices and communication activities are required to raise awareness about the policy and **increase compliance rates**;
- iii. observe whether any additional **infrastructure or tools need to be used** to collect evidence on compliance;
- iv. determine whether any **sanctions need to be implemented** to enforce a systematic compliance with the policy;
- v. and start the process of assessing the **benefits that OA** is bringing to the institution as levels of OA outputs grow.

Monitor Open Science Policies – why and how?

To monitor compliance with OA policies the process must be able to identify:

- The key feature of monitoring compliance is to measure the proportion of research outputs that have been made (or will be) Open Access and that effectively comply with the OA policy requirements.
 - i. total number of research outputs subject to the policy,
 - ii. total number of full-text OA research outputs in the repository,
 - iii. the number of embargoed full-text items that will become OA at a later date.
- Monitor compliance with policy by comparing repository content with indexed records in bibliographic reference databases such as ISI WoS and Scopus, ...
- Monitor policy in a systematic way
- Involve researchers and project managers
