MOS - SPRING CAMPAIGN

Help
the
Birds

This Spring, MOS will be out in force. Here at MOS we feel that everyone should know just how bad the bird situation in Malta really is.

So, this Spring MOS is campaigning for:

- * Authorities to uphold and enforce the bird protection laws.
- * Public awareness about the situation.

MOS feels that the laws in Malta are not presently strict enough to control hunting on our islands - and in the sea around us. This leniency has resulted in hunters shooting and trapping birds in "prohibited" areas (Buskett, Manoel Island, Ghadira). Hunting of protected species continues while the number of collectors owning stuffed specimens of protected species continues to rise.

MOS is proposing that :

- * Closed season starts on March 1st.
- * Malta's bird legislation be brought upto European standards.
- * Shooting birds from the sea is stopped.
- * An examination to be taken by everyone applying for a hunting licence.
- * Some species of birds be removed from the list of birds that can be hunted.
- * It be made illegal for anyone to have dead birds (including stuffed) in their possession if the bird is protected.

A CARING COMPANY

A step in the right direction has been taken by the Brandstatter Group of Companies.

Brandstatter - reknowned world wide as the creators of the Playmobil toys - have dedicated the year 1992 to the Enviroment, Health and Safety. The first event of the year was an exhibition at Brand International Limited, Bulebel.

MOS were present at the highly successful exhibition which ran from 23-31 March. The exhibition was open to employees of Brandstatter and their families.

In a further display of enviromental awareness Brand International Limited have given Lm150 to MOS. This money will be used to sponsor an MOS project during the coming year.

Thank you Brand for showing that you care.

CLOSER TO NATURE

During their long journey home, birds leaving Africa to return to Northern Europe cross the Mediterranean Sea. During their crossing thousands of birds stop in Malta. The Ghadira Nature Reserve - open to the public every weekend - will soon be full of birds of all size and colour.

Each Spring the number of birds in Ghadira swells giving you the chance to see some amazing birds. Herons, egrets, kingfishers and many, many other types of bird can be seen.

When you visit the Ghadira Nature Reserve you will be sure to enjoy every minute.

Experienced guides take small groups round the reserve at hourly intervals. To ensure maximum enjoyment binoculars and a talented bird spotter are provided. Once you've been round the Reserve take a look at some of the goods on sale in the reception centre.

The Ghadira Nature Reserve - open weekends - bringing you closer to nature.

FORUM

All members are invited to attend and participate in a public forum on Bird Hunting and the European Community. During the forum which will be chaired by Dr. Paul Xuereb guest speakers will give their view on the subject, followed by comments from the public.

The forum which is part of the campaign for better legislation will be of interest to all MOS members.

The forum will be held on Saturday 25th April at 10.00a.m. in the Giuseppe Despott Hall at the Ministry of Education in Floriana.

AND ...

Support our campaign for better legislation. Put pen to paper and write a letter to a local newspaper. The more letters in the press, the more people realise that many do not agree with the annual massacres of birds in Malta.
