THE MALTESE TEXTILE INDUSTRY IN ANTIQUITY

by

Rev. J. BUSUTTIL, B.A.(Hons.), Lic.D., Ph.D.(Lond.)

Ancient writers, both Greek and Latin, refer in their works to a Maltese textile industry. Not only do these writers mention the existence of this industry but they also speak of the finished articles. Varro, the writer of Roman Antiquities, refers to a Maltese 'mitra' 2; Diodorus Siculus, the Historian, speaks of 'θέωτας' which the ancient inhabitants of Malta used to produce 3; Cicero mentions 'vestis melitensis' and alludes to a 'pulvinus melitensis' 4; Silius Italicus speaks of the Maltese 'tela' 5 and Novius of a Maltese 'supparus' 6.

It is not known when this industry was first introduced in Malta. Apparently it had already been in existence in prehistoric times 7. It is clear that the industry must have existed well before the third century B.C. Callimachus (died 240 B.C.) is the first Greek poet who refers to the Maltese textile products. He simply calls them 'Μέλιται' which shows that these articles had already been well known before Callimachus's time 8. Apparently it was still flourishing in Hesychius’s time, i.e. in the seventh century A.D.

It has been commonly held that the ancient Maltese textile articles were made out of spun cotton. The reason why several scholars have been of this opinion is that up to the eighteenth century the Maltese islands were renowned for their cotton crop and their cotton industry. It has, however, been shown that the cotton industry was first introduced in Malta and in Sicily by the Arabs in the ninth century. 9

1. Cf. DIODORUS SICULUS, 5,12: τεχνης τε γηρ ἕκκα παντάδαιον των ἁργασιῶν κρατατοις δέ τοις θόνα πανοτας; CICERO, In Verrem, 11,4,103: Insula est Melit... in qua est eodem nomine oppidum . . . quod tamen isti teixtrinum ad muliebrem vestem conficiendam fuit.
2. Varro, Sat. Men.: mitram melitensem, (apud Non. 14,16); Cf. Also Lucretius, 4,1129: et bene parta patra patum hunt anademata, mitrae interdum in pallam atque alidensia Ciague vertunt. Lambinus emends the meaningless alidensia into Melitensis.
3. See Above. Cf. also HESYCHIUS 1027: θίβανω τινα δίξωρα ἐκ Μελιτῆς τῆς νησιον.
6. Apud Non. 540,11: NACH RIBBECK, Melitensem nicht Veliensem zu lesen ist, spricht von einem supparus melitensis lineus (Real-Encyclopedie, Article on Flachs, p. 2460).
Sir T. Zammit in his work ‘Prehistoric Malta’ relates how incinerated specimens of calcined textile going back to prehistoric times were obtained from debris. These specimens were examined in a laboratory and it has been established that the material ‘is most likely flax or a fibre of that type’. 10 Flax or lint, of course, is the material from which linen, not cotton, is produced. So, if there was a textile industry in Malta in prehistoric times, it must have been a linen industry.

Although those ancient writers who mention the Maltese textile industry have never referred explicitly to the material out of which the finished articles were produced, nonetheless, since they have used certain particular words to denote these articles, it is evident that it was linen, not cotton, they had in mind.

Diodorus Siculus and Hesychius mention the Maltese ὅθονα. Now according to Hesychius himself, the word ὅθονα means λινὸ ἱματια or linen garments. Novius employs the word supparus. The grammarian Nonius says that supparus is “vestimentum puellare lineum” 11 and according to Festus “velum omne, quod ex lino est, dicitur supparum” 12. Cicero has vestis melitensis. Vestis is a general word used to designate any kind of dress made out of any kind of material. It is known, however, that Verres blackmailed those merchants who came to sell their wares in Sicily into giving him, among other things, “vestem linateam” or linen garments. 13 It is also known that Verres took out of Sicily a large quantity of Maltese garments 14. It does not seem improbable that some of the linen garments which Verres took to Rome were the “linen garments” which he had obtained from the merchants, some of whom, might have been Maltese. Furthermore Cicero mentions a Maltese ‘pulvinus’ or ‘cushion’. He says that this pulvinus was plerucidus or transparent. The adjective transparent suits more a linen material than a cotton one.

Silius Italicus says that Malta was proud of its “tela lanigera”. Tela lanigera stand for woolen fabrics. This could mean that there was in Malta a woollen industry side by side with the linen one — which is most unlikely as the existence of this second industry is not supported by any other evidence — or it might be that the word originally employed by Silius was not lanigera (woollen) but linigera (linen) 15.

We can rightly conclude, therefore, that all the evidence — historical, archeological, and linguistic — points to the existence in Malta of a linen industry. Mayr maintains that this industry did not die out with the coming of the Arabs and that in his own days linen was still woven especially in Gozo. 16

The textile industry was the most important one in ancient times. Diodorus Siculus says that there were craftsmen of all sorts in Malta, but the most

12. Ib. 311,3.
important ones (κρατιστά) were engaged in the production of ὀθονία 17. During Verres's governorship (71-68) the principal town of the island was one large factory producing women's clothing 18. Cicero accuses Verres of having helped himself to very large quantities of Maltese vestis 19. This shows that in the first century B.C. the industry must have been prosperous and that many workers were employed in it. In ancient times women usually worked in the production of Othonia, sometimes, however, the ὀθονοποιοί were also men.

Since a great supply of water is needed to cultivate flax, it is not unlikely that flax was not actually grown on the island but imported from abroad. 20 The raw material would then be woven into Othonia, mitrae, suppari, etc., by the local Othonopoioi. When Malta was in the hands of the Carthaginians the finished articles would in all likelihood be sent to Carthage from where they would be re-exported to all the parts of the Mediterranean. When the Romans took over the administration of our islands the woven products would be exported to Sicily and from there taken to Rome. Individual drapers (ὁθονοποιοί) would cross to Sicily and sell their goods there.

The ancient textile industry was mainly geared to the production of women's clothing. The word Othonia is normally used in Greek to denote a certain type of feminine dress. Cicero tells us that the town Melita produced muliebrem vesture; and he charges Verres with having stolen large quantities of Maltese garments in order to give them as presents to the wives of his friends 21. The supparus was similarly worn by women.

Apparently Maltese textiles were highly appreciated abroad and they seem to have been firmly established in African and Italian markets. Hesychius quoting Callimachus refers to the Maltese garments simply as Melitaia 'the Maltese', which means that they were well known in Callimachus’s days. Likewise Cicero speaks of the Melitenses, ‘the Maltese’, which shows that in the first century B.C. these garments had made great headway in the Roman markets.

What made these manufactured articles famous was their quality. “They are distinguished”, says Diodorus, “for their fineness and for their softness”. Hesychius calls the Maltese Othonia ἀκρόφρα (remarkable) and Silius Italicus says that Melite is proud of its woven cloth. It is not known what prices these garments fetched. Presumably they were luxury goods and so they must have sold pretty well.

So far we have treated of the existence, importance and quality of the Maltese textile industry in antiquity. Now we shall go over the different textile articles one by one and try to say something about each one.

17. 5,12.
18. In Verr. 2,4,103.
21. Cf. In Verr. 11,4,103-104; 11,2,183: sed tantumne Melitensium, quasi etiam amicorum uxores . . . ornaturas esses?
A. MITRA

“*A Maltese mitra*”.

The Roman ‘*mitra*’, (a loan-word from the Greek language) was a headband mostly worn by women to tie up their hair 22. It was a long and wide ribbon usually made of linen 23.

B. OTHONIA

Diodorus Siculus 5, 12: τεκταγε τε γάρ ἐκεὶ πανταδόπους τας ἐργασίας τῇ τε λεπτοτητὶ καὶ τῇ μελανοτητὶ διαπρεπῇ.

“For the island has all sorts of craftsmen (working) in its workshops; but the most important ones are those who work on Othonia which are distinguished for their fineness and softness”.

Heschyius, 1027: Μελιταία (Call. fr. 393) ὀδοντὰ τινὰ διαφόρα ἐκ Μελητῆς τῆς νησοῦ “Maltese (garments): certain remarkable Othonia from the island of Malta”.

C. VESTES

“I maintain that you (Verres) have taken out of Syracuse a considerable amount of Maltese vestes”.

*Id:* 2,2,183: Unde Tantum Melitensium . . . sed tantumne Melitensium, quasi etiam amicorum uxores . . . ornaturus esses?

“From where have you taken such large quantities of Maltese vestes . . . but were such quantities really necessary? you give the impression that you wished to adorn your friends’ wives as well (as yours)”.

*Id,* 2,4,103: Insula est Melita . . . in qua est eodem nomine oppidum, . . . quod tamen isti textrinum per triennium ad muliebrem vestem conficiendam fuit.

“There is an island, Malta, in which there is a city bearing the same name. For three years this city has served as a factory to produce women’s vestes for the sake of Verres”.

These vestes were a sort of transparent *stolae* worn on top of the *tunica interior* by women in Rome. 25 Most of these vestes were exported to Sicily from where they were re-exported to Rome.

22. Cf. on *Mitra* in R.E.
D. PULVINUS

Cic. In Verrem, 2,5,27:

Nam, ut mos fuit Bithyniae regibus, lectica octaphoro ferebatur, in qua pulvinus erat perluxidus melitensis rosa fartus.

"Following the custom of the old kings of Bithynia Verres rode in a litter carried by eight men. In the litter there was a cushion of transparent Maltese cloth stuffed with roses".

The pulvinus mentioned here could either be the squab on which the traveller sat, or else the cushion on which the traveller rested his head. The pulvinus was in normal circumstances stuffed with algae, dried leaves or feathers. In Cicero’s time, however, people like Verres who wanted to make an ostentatious display of their wealth, had their couches and cushions filled with roses or violets. If we read ‘Melitensis’ with the Oxford edition of Cicero’s Oration, we have to conclude that these roses were not necessarily Maltese — most probably they were not. The pulvinus was usually made of ordinary cloth. sometimes, as in this case, it was made of very fine linen.

E. SUPPARUS

Novius: supparus melitensis lineus (Non. 540,11; after Ribbeck).

“A linen supparus made in Malta”.

A supparus or supparum (Σπάρος) was a linen garment worn by women. It was introduced in Rome in the 3rd century B.C. It was a tunic worn over the tunica interior which reached to the feet.

It is reasonable to assume that the words Othonia, vestis and supparus mean one and the same object: they all designate in their contexts a feminine garment made of linen. Furthermore although it is not known when the textile industry was set up in Malta, it is evident that the Carthaginians influenced it considerably. The word othonion is closely connected with the Semitic word etun; supparus, according to Naevius, was a punicum vestimentum or a Phoenician dress; Phoenician mitres were famous and Carthage exported a good number of cushions.

27. Id. Vol. VI, pulvinus; Cf. also Cic. Fin. 2,65; Tusc. 5,73; Horace, 1,1, Od. 5, 5,1.
28. Id. Vol. VI, pulvinus.
30. Cf. FESTUS, 310,15.
