SCHOOL DEVELOPMENT PLANNING

Joseph Micallef

"Those who do not plan, plan to fail"

"SDP should be about maximising success and reducing failure."

JOSEPH MICALLEF

B.ED. (Hons.), Dip.Ed. (Adm. & Mgt.) is a teacher of Italian. He is a member of the editorial board of LO STIVALE. He is also a recent member of the British Educational Management and Administration Society.

The Education Division, while retaining certain powers for itself, is seeking to locate more and more decision-making at the school level.

Development of decentralised school management, with the school taking increasing responsibility for the quality of the education it offers, depends on the school ability to be proactive rather than reactive.

This can begin to happen if a clear vision is set down and effective means are put forward to achieve that vision. Research has shown that the only way of achieving this is to engage in a meaningful process of school development planning.

SDP should be about maximising success and reducing failure.

The purpose of the school development plan is to aid development of areas of the school's organisation and practices.

The SDP is the main factor influencing where the school concentrates its efforts and spends the funds available. The backdrop for the whole process of producing the SDP should be an agreed vision and the changing needs of both those who serve in the school and those which the school serves.

The process of producing the SDP has the following four stages:

The Audit: The school reviews its strengths, weaknesses and omissions and then identifies which areas need to be developed;

Plan Construction: The priorities for development in the following three years are

<table>

Reorganise

Exchange 1

Reconstruct

Form 1

Finalise plan
Implementation of the SDP: The plan becomes a working document and begins to be put into practice. At the same time the detailed action plan for the following year is constructed.

Evaluation of the SDP: The implementation process is monitored regularly and updated. It is also evaluated against the pre-established performance indicators.

This is an example of how the school can translate the audit into a plan (stage two of the development plan). The lead up to this stage can be found on page 34.
This is an example of how an audit can be conducted (stage 1). The schematic diagram reproduced on pages 32 and 33 is the finished product (stage 2), which leads to the actual implementation.

"List down the strengths, the weaknesses and the omissions of the school"

The Audit stage: beginning to share in the control of the school

The purpose of this document is to carry out the audit stage.

Through this exercise we will find out where we are. Your views are important. You are asked to:

**Step 1**

Think about/discuss the strengths, the weaknesses and the omissions of the school. It is felt that you should think particularly about the areas which will represent the main headings of the schematic diagram forming the whole school plan.

These are:
- a. The Climate (school’s philosophy and ethos);
- b. The Management (school’s organisation systems);
- c. The Curriculum (school’s curriculum statement and its sub-units for every department);
- d. The Staff (school’s teaching and non-teaching staff);
- e. The Resources (school’s physical resources; buildings and sites);
- f. The Constituency (school’s external links from parents to central government).

List down the strengths, the weaknesses and the omissions of the school and state your (individual/group/departmental) reason/s for considering them to be so.

**Step 2**

Prioritise the areas which you feel should be included in our three-year SDP and suggest how and when these developments should be implemented.

Please remember that we have to plan for the next three years.

Research has shown that the plan should be realistic, neither too ambitious, not too insufficiently demanding. There should be no more than two major priorities in each key area in each year.

At this stage, it might be useful to know, according to the latest projections, what the school’s budget (government grants and fund raising) over the next three years will be. However, it is most important that finance should be seen as neither the starting point nor as a separate activity from the education process.

Therefore, the funds available should be seen in the context of what the school is trying to achieve and not as a factor predetermining the debate of where we want to go.
