"The environment is a common property to all generations held by the living in usufruct for the unborn."

Thomas Jefferson
PREFACE

This work is the second bibliography on the environment, based on holdings of the University Library, published in the last recent years. The first, entitled, “Environment – a select bibliography,” was published in 1992 and compiled by Anita Ragonesi and Joanna Felice. This bibliography was limited to 100 titles from foreign studies. Since then, interest from students and other environmental conscious persons has grown considerably. The concern of the public for environmental matters has increased as shown in the recent outcry against the proposed cement plant. Moreover, several new opportunities for environmental studies have arisen in the University of Malta. Many graduate theses and undergraduate dissertations or long essays have been submitted. One of the authors, Anton Pizzuto is a graduate of one of these new programs. He is currently the Director of the Cleaner Technology Center and Head, Scientific Division of Malta University Services Ltd., focal point on Cleaner Production of the Mediterranean Action Plan. On the other hand, Joanna Felice works as a Reference Librarian at the University Library and she is very much aware of the constant request of this important topical subject.

Traditionally, the Melitensia Collection at the University Library was considered by many to hold interest only for readers from the humanities. However, a large number of works suitable for scientists and students of science are also held in this Department. In fact we document over 400 works from the area of local environmental science. Prominent Maltese scientists have written some of these works.

For ease of Reference we have decided, after consulting experts in the field, that the bibliography be divided into works from the Reference Department (including encyclopedias, dictionaries, directories, Maltese legislation and legal notices) and Melitensia Department, (including papers, reports, monographs, graduate theses and undergraduate dissertations or long essays). Each holding shows title of work, author, publisher, year of publication and shelfmark. A keyword index and an author index have been included to facilitate the use of this bibliography. We are planning to up-date the bibliography regularly.

FOREWORD

It gives me great pleasure to have been asked to write a foreword to this important reference text.

I must immediately confess that I was surprised at the vast wealth of environmental information archived in the Melitensia Department of our University. The dissemination of such information is essential not only in an academic context but also for a better understanding of our environment and of those factors, which influence it.

Such dissemination of environmental knowledge forms an integral policy of the Ministry for the Environment and of the Environment Protection Department.

The publication of this Bibliography on the Environment coincidentally happens concurrently with the publication by the Environment Protection Department of Malta’s first ever State of the Environment Report, an important national document which I am certain will be included in the next update of this bibliography.

I am also certain that future authors making a contribution to the next State of the Environment report will find such a bibliography an essential reference source to data related to the Maltese environment.

Francis Zammit Dimech
Minister for the Environment
FOREWORD

It gives me great pleasure to have been asked to write a foreword to this important reference text.

I must immediately confess that I was surprised at the vast wealth of environmental information archived in the Melitensia Department of our University. The dissemination of such information is essential not only in an academic context but also for a better understanding of our environment and of those factors, which influence it.

Such dissemination of environmental knowledge forms an integral policy of the Ministry for the Environment and of the Environment Protection Department.

The publication of this Bibliography on the Environment coincidentally happens concurrently with the publication by the Environment Protection Department of Malta’s first ever State of the Environment Report, an important national document which I am certain will be included in the next update of this bibliography.

I am also certain that future authors making a contribution to the next State of the Environment report will find such a bibliography an essential reference source to data related to the Maltese environment.

Francis Zammit Dimech
Minister for the Environment
ACKNOWLEDGMENTS

This project would not have been possible without the support of the following people. We would like to thank Dr. Paul Xuereb, Consultant to Rector and Advisor - Collection Development for his constant support and constructive criticism; Dr. Patrick Schembri, Professor Department of Biology, University of Malta for his careful reading of prior draft and who offered important advice on how it could be improved; Ms. Tessa Baluci, Librarian - Informa Current Affairs Agency, for making us aware of the large amount of literature on the environment, published in local newspapers; Mr. A. Mangion, Director Library Services University of Malta for his constant encouragement and support; Ms. Josephine Spiteri for her guidance towards the Melitensia environment sections, for her recommendations regarding subject headings, and for compiling the list of Maltese Environment periodicals.

JOURNALS

The main library subscribes to a number of journals (classes B, HC, HD, HM, HT, K, L, Q, QH, QL, TD and TH) on the environment. The current numbers are displayed in the Reference Department. The back numbers of journals in the social sciences, education and law (classes H, K and L) are kept in the SGS Thomson Room (opposite the circulation desk). The back issues of the science and engineering journals (classes Q and T) are housed on the second level of the library. Local newspapers containing articles, reports, editorials, letters, speeches, press conferences, features, parliamentary questions and responses relating to the environment are kept in the Melitensia and Reference Departments.
