

Ringling Report for 2017–2018

Mark Gauci

The report covers the ringing activities of the BirdLife Malta Bird Ringing Scheme for the years 2017 and 2018. During the years under review the licensed ringers were: John Attard Montalto, James Aquilina, Martin Austad, John J. Borg, Denis Cachia, Victor Cilia, Charles Coleiro, James Crymble, Jean Paul Farrugia, Nicholas Galea, Raymond Galea, Charles Gauci, Mario V. Gauci, Mark Gauci, John Grech, Emanuel Mallia, Joseph M. Mangion, Glenn Micallef, Tim Micallef, Patrick Sammut, Alice Tribe and Adin Vella.

The ringing group lost one of its mentors and founders when Joe Sultana passed away in 2018 after having given up his ringing licence in 2017. The ringing group will always be indebted to Joe's work and dedication towards the setting up and the running of the ringing scheme.

Ringling Totals

In terms of ringing totals the figures of 14,440 birds ringed of 106 species for 2017 and 14,990 birds ringed of 111 species for 2018 respectively rank as the lowest recorded for the past five years. Whilst the effort from the ringers remained constant the low figures recorded were the result of poor migration and low numbers of wintering species.

Year	Number of Birds Ringed	Number of Species
2017	14459	106
2018	14990	111
Grand Total 1965– 2018	616,017	226 + 2 hybrids

In terms of new additions to the ringing list two Greater Flamingos in 2017 and a further five in 2018 were all ringed and released after a brief rehabilitation period. The same story applies for the 1st Audouin's Gull ringed in 2018. The final addition to the ringing list was a Bar-tailed Godwit ringed at Ghadira Nature Reserve in 2018 where it stayed for over one month. The first Western

Orphean Warbler ringed since this species was sub-divided was ringed in 2018. This would make it the 6th local Orphean Warbler ringed. Additionally a number of scarce migrants or vagrants were ringed, namely the 2nd Eurasian Blue Tit, the 3rd Moussier's Redstart, the 8th, 9th and 10th Melodious Warbler, the 9th Dusky Warbler, the 4th Blyth's Reed-warbler, the 2nd Cattle Egret, the 2nd European Roller and the 5th Eurasian Sparrowhawk. Worth noting were also a couple of Rufous-tailed Scrub-robin, a Little Bunting, a Rustic Bunting and ten Lesser Whitethroat. Wader species registered good totals for 2017 with all ringed at Għadira and Simar Nature Reserves; 2018 was poorer since ringing waders at Għadira was not possible due to number of Greater Flamingos on site. Good totals for Common Swift and Pallid Swift were also recorded with most ringed at their breeding site in Mosta. Most of the birds of prey recorded in the ringing list were all released after having been rehabilitated.

Ringling Sites

The sites in use were Għadira Nature Reserve and Simar Nature Reserve with these sites used as constant effort sites. Wied l-Aħmar in Comino was used as usual for the spring and autumn projects. Other sites used sparingly were Rabat, Buskett, Targa Gap (Mosta), Salina, Mtaħleb and Wied Għollieqa Nature Reserve in San Ġwann.

Several seabird colonies, including Filfla Island, were monitored as part of the obligations under the Arcipelagu Garnija Life project.

RINGING RECOVERIES

Key to symbols and terms used in the recovery list

Arrangement of entry

Recoveries are arranged by species and within species usually by date of the recovery letter.

Ringling details are given on the first line and recovery data on the second.

Ring number

A ring in italics indicates that the ring has been returned and verified.

Age code

1 pullus; young bird ringed in the nest. A number in brackets beside this age code indicates brood size.

2 fully grown; year of hatching quite unknown.

3 definitely hatched during current calendar year.

3J as in 3, but bird still partly or totally in juvenile body plumage.

4 hatched before current calendar year - exact year unknown.

5 definitely hatched during last calendar year.

Sex

M male

F female.

Date of recovery

Where this is unknown the date of the reporting letter is given instead and is shown in brackets. A 00 in the date indicates that the exact day or month are unknown.

Manner of recovery

v caught or trapped, and released with ring (controlled)

+ shot or killed by man

x found dead or dying

xA found long dead

() caught or trapped alive and not released, or released but with ring removed

B breeding when recovered

C recovered at colony

R recovered in roost

S Sight record (Colour ring)

/?/ manner of recovery unknown.

FOREIGN-RINGED BIRDS RECOVERED IN MALTA

Greater Flamingo *Phoenicopterus roseus*
