**SUMMER SCHOOL COLLABORATIVE RESEARCH IN MENTAL HEALTH:  
A WORKSHOP FOR MENTAL HEALTH STUDENTS AND PROFESSIONALS**  
**6th –10th July 2026    University of Malta, Malta**

**About**

This one week summer school responds to the increased demand for mental health promotion and well-being within a participatory approach. It is designed to provide participants from healthcare, education, social work, mental health, and research with the practical and research skills required in designing, implementing, and evaluating collaborative projects in mental health. It emphasizes the scientific understanding of the practical conditions that improve research and practice in mental health, substance abuse, recovery, and well-being, which is fundamentally important both at individual and societal levels. Participants will receive training in various theories and methods related to collaborative research and how to implement the CORE-Arctic framework for collaborative research in mental health. In this way, participants will be able to develop their own version of collaborative research, well suited with the local context. Throughout the week, course participants will design a collaborative research project with a high degree of user participation.

**Learning Outcomes**

Participants of this one-week summer school will develop skills in designing, implementing, and evaluating collaborative mental health projects using a participatory approach. The training includes theories, methods, and the CORE-Arctic framework, enabling participants to create context-specific research models. By the end of the course, they will have designed a user-involved collaborative research project, enhancing their ability to promote mental health and well-being.

**Course Tutors:**

Prof Rita Sørly, Department of Child Welfare and Social Work, and Director of the Arctic Youth Research Center, UiT Arctic University of Norway

Prof Merete Saus, Department of Education, UiT Arctic University of Norway

Prof Marius Storvik, Faculty of Law, UiT Arctic University of Norway

Sunniva Solhaug Fjellidal, PhD Candidate, Department of Health and Care Sciences, UiT Arctic University of Norway

NB. The summer school has a value of 5 ECTS credits
