

# STATUTE GOVERNING THE OPERATIONS OF RESEARCH CLUSTER

## <THE MALTESE POPULATION GENOMICS RESEARCH CLUSTER>

The University of Malta <The Maltese Population Genomics Research Cluster (MALGENPOP)> (hereinafter "the Cluster") is a multidisciplinary research initiative that aims to

MALGENPOP aims to catalyze population-scale genomics research in Malta by generating an unprecedented, large-scale genomic dataset derived from the DwarnaBio national biobank. Our mission is to create a comprehensive, high-quality collection of whole-genome sequences using a blend of short and long read technologies that will serve as a foundational resource for the systematic analysis of genetic variation in the Maltese population. This dataset will empower bioinformaticians, geneticists, clinicians, and data scientists at the University of Malta and beyond to address critical questions in human health, disease, and population history.

By focusing on the generation of a deeply characterized genomic dataset, MALGENPOP complements and amplifies the bioinformatics expertise already present at UM, particularly the cutting-edge methodologies developed by the ERA Chair in Bioinformatics and affiliated researchers. The Cluster's output will fuel computational research across disciplines, enabling the integration of genomics with medical informatics, machine learning, and statistical genetics. MALGENPOP is not simply a sequencing initiative; it is a mechanism for discovery, designed to unlock insights into the genetic architecture of complex diseases, identify population-specific risk variants, inform precision medicine strategies, and explore the evolutionary history of Malta's unique genetic heritage.

Central to our mission, is the principle of open science: we are committed to build an ethically governed, well-curated and accessible genomic resource that will serve as a national asset and a catalyst for collaborative research. We will engage participants, the public, and external stakeholders to ensure that the research is community-driven, ethically sound, and maximally impactful for health and society.

MALGENPOP envisions Malta as a Mediterranean hub of excellence in population and clinical genomics, where a unified ecosystem of biobanking, sequencing and bioinformatics transforms genomic discovery into clinical translation with a measurable public-health benefit. Anchored by three interdependent pillars – a nationally representative longitudinal biobank richly annotated with electronic-health-record data; population-scale long- and short-read whole-genome sequencing that resolves structural variants and rare alleles; and an AI-enabled bioinformatics framework spearheaded by the UM ERA Chair – MALGENPOP will generate a high-resolution Maltese reference genome dataset accessible to researchers and clinicians in compliance with

FAIR and Open Sciences practices. This resource will become the cornerstone for a diverse research portfolio spanning rare-variant discovery, disease-genomics, pharmacogenomics and comparative population studies, while simultaneously serving as an imputation panel for regional cohorts and a benchmarking set for advanced computational pipelines such as de-novo assembly, rare-variant burden testing and machine-learning-based phenotype prediction.

MALGENPOP aims to generate a large, accessible dataset that meets foundational ethical and data protection requirements. It will empower reclassification of variants of uncertain significance, calibration and validation of population-specific polygenic risk scores for prevalent chronic disorders, and empower integration of population-scale genomic data with electronic health records for clinical translation. At the policy level, MALGENPOP will quantify actionable genetic risks to inform screening guidelines, enable equitable resource allocation and evidence-based rare-disease diagnostics. Data generated from MALGENPOP will support clinician-scientist training and specialisation in genomic medicine, while transparent governance and sustained public-engagement mechanisms will position research participants as informed partners and custodians of their data.

By coupling data generation with computational innovation and immediate clinical translation, MALGENPOP secures genomic sovereignty for Malta, reduces non-communicable-disease disparities, and establishes a durable platform for downstream industry collaborations, Horizon Europe and BBMRI-ERIC funding, and future participation in EU-wide initiatives such as 1+MG. The legacy will be a cycle of data, expertise and discovery that strengthens Malta's leadership in precision medicine and contributes uniquely to the global understanding of human genetic diversity.

There shall be a Research Cluster, managed and overseen by an Executive Committee:

## **I. THE RESEARCH CLUSTER**

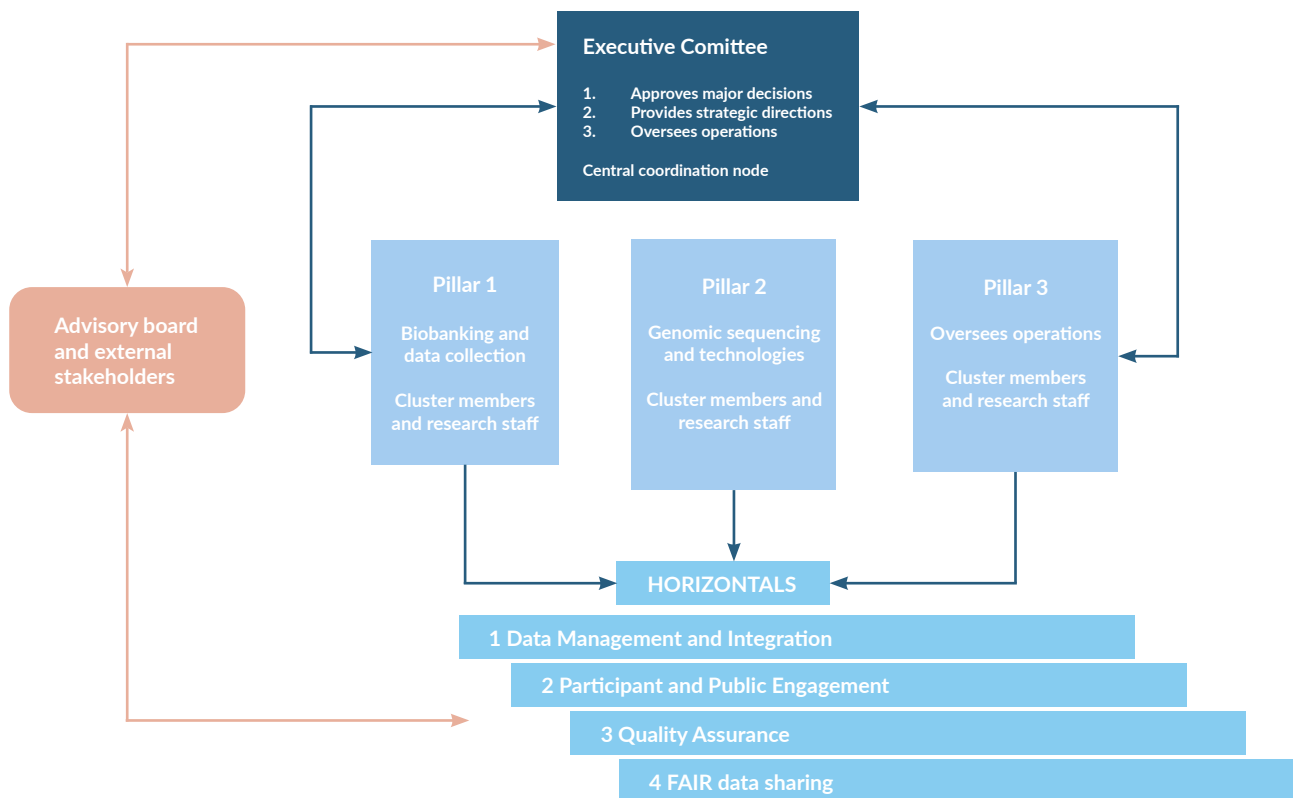

1. The organisational structure of the <MALGENPOP Cluster> will be as follows:

The Executive Committee will be composed of leading academic staff members from the respective pillar area(s) / horizontals thereunder. They will be responsible for providing strategic direction, approving major decisions, and overseeing MALGENPOP overall operations. The Committee will have balanced representation from each active Pillar and each horizontal thereunder, with a chairperson to lead. New members can be appointed to the Executive Committee consisting of the Leads of a Pillar and relative Horizontals, as and when further Pillars within the Cluster are created or activated. A proposal to activate a new pillar, including the funding mechanism, needs to be proposed to the Executive Committee. A two thirds majority of the Executive Committee will be required to activate a new pillar.

The Executive Committee shall be composed of nine members. Seven members represent the leads of each of the three research pillars 1) Biobanking and Data Collection,

2) Genomic Sequencing and Technologies, and 3) Bioinformatics and Data Analysis – and the four horizontal thematic areas, namely Data Management, Participant and Public Engagement, Quality Assurance, and Data Sharing.

In alignment with the Cluster governance model, two representatives from the external stakeholders such as the Office of the Chief Medical Officer, Public Health Directorate, or Mater Dei Hospital's Research Directorate – will be appointed to the Executive Committee. Their inclusion ensures that national health priorities, clinical relevance, and translational feasibility are embedded in the cluster's decision-making processes from the outset. An organogram is provided.

## 2. Membership of the Cluster shall proceed as follows:

- i. All academics who are Council-appointed University of Malta members of staff having a demonstrable research track or interest in the subject matter of the Cluster, are eligible to become members of the Cluster with voting rights.
- ii. Researchers at UM who are not resident academics, such as RSOs, can be associate, non-voting members of the Cluster.
- iii. To attain membership, the applicants require the approval of the Executive Committee. Such approval shall not be unreasonably withheld and the Executive Committee shall adopt the following criteria for membership approval:

Membership shall be based on the following criteria and procedures:

**A. Application submission** – Applicants shall submit a formal written application addressed to the Executive Committee (ExCo), accompanied by:

- a. a current curriculum vitae;
- b. a concise statement (maximum two pages) describing their research interests and how these align with the objectives of MALGENPOP;
- c. a declaration of the Pillar and/or Horizontal activity to which they intend to contribute; and
- d. a motivational note outlining their potential contribution to the Cluster's activities, training programmes, and/or strategic objectives.

**B. Eligibility** – Applicants must:

- a. hold an academic, research, or technical appointment at the University of Malta, or be formally affiliated through an approved collaboration agreement;
- b. demonstrate a relevant research or professional track record in one or more of the Cluster's thematic areas
- c. commit to active participation in Cluster activities, including meetings, proposal development, and collaborative initiatives.

**C. Membership categories** –

- a. *Active Members* are those who contribute substantively to at least one Pillar or Horizontal, may hold office within the Cluster, and possess full voting rights.
- b. *Observers* are those whose expertise or institutional role is complementary to the Cluster's objectives but who are unable to participate actively. They may attend meetings upon invitation, contribute to discussions, and collaborate on specific initiatives, but do not have voting rights.
- c. The ExCo may, at its discretion, reclassify membership status following review of participation over time.

**D. Assessment and approval process** –

- a. The ExCo shall evaluate applications on a rolling basis at scheduled meetings.
- b. Decisions shall be reached by simple majority vote; rejection of an application shall require justification recorded in the minutes and a two-thirds majority vote.
- c. Feedback on unsuccessful applications shall be provided in writing within 30 days, and applicants may reapply after addressing the identified gaps.

**E. Expectations of Active Members** –

Active Members are expected to:

- a. participate in at least one Cluster meeting or event annually;

- b. contribute to collaborative outputs such as publications, funding proposals, or training activities;
- c. uphold the ethical, scientific, and open-science principles of MALGENPOP; and
- d. declare any conflict of interest relevant to the Cluster's operations.

#### **F. Review of Membership –**

Membership status shall be reviewed biennially by the ExCo to ensure continued alignment with Cluster objectives. Members who remain inactive for two consecutive years without valid justification may be reclassified as Observers or have their membership discontinued.

#### **iv. cluster members may be removed for:**

Membership in the Cluster may be withdrawn by decision of the ExCo in the event of persistent non-compliance with the obligations of active participation or conduct incompatible with the Cluster's mission. Removal of a member shall not be undertaken lightly and shall require a two-thirds majority vote of the ExCo, following written notification to the member concerned and an opportunity to respond.

The following shall constitute grounds for consideration of removal or reclassification of membership status:

- A. Non-participation** – Failure to attend three consecutive Cluster or Pillar/Horizontal meetings without valid justification, or persistent failure to engage in Cluster activities over a twelve-month period.
- B. Failure to meet agreed deliverables** – Repeated inability to fulfil responsibilities, tasks, or deliverables formally assigned or voluntarily undertaken within the scope of Cluster projects, despite reasonable opportunity and support to do so.
- C. Neglect of collaborative obligations** – Consistent lack of contribution to joint initiatives, working groups, or reporting duties necessary to maintain the operational or scientific progress of the Cluster.
- D. Breach of ethical or institutional standards** – Conduct that violates the University of Malta's research integrity, data governance, or ethical policies, or that undermines the scientific reputation or collaborative environment of the Cluster.
- E. Conflict of interest or confidentiality breach** – Failure to disclose or appropriately manage conflicts of interest, or unauthorised disclosure of confidential or pre-publication information.
- F. Inactivity following notification** – Failure to respond to a written notice of inactivity within thirty days or failure to rectify the identified issues within three months of notification.

Following deliberation, the ExCo may:

- a. issue a formal warning;
- b. reclassify the member as an Observer; or

c. withdraw membership entirely.

Decisions of the ExCo shall be communicated in writing to the member, with justification recorded in the minutes. Reapplication for membership shall be permitted after a minimum period of one year, subject to demonstration of renewed commitment to the Cluster's objectives.

3. The Research Cluster will initially comprise 3 Pillars and 4 Horizontals> as approved by the Research Cluster Committee.

i. The Pillars will initially be as follows:

#### **Research Pillars**

##### **A. Pillar 1 – Biobanking and Data Collection**

Establishes a nationally representative, longitudinal biospecimen and phenotype repository to underpin population-scale genomic and translational research.

##### **B. Pillar 2 – Genomic Sequencing and Technologies**

Implements high-throughput short- and long-read sequencing and multi-omic profiling to characterise genetic variation and molecular diversity within the Maltese population.

##### **C. Pillar 3 – Bioinformatics and Data Analysis**

Develops and maintains computational pipelines, statistical models, and AI-driven analytics for processing, integrating, and interpreting genomic and multi-omic datasets.

#### **Horizontals**

##### **A. Horizontal 1 – Data Management and Integration**

Builds a secure, interoperable data infrastructure linking biobank, sequencing, and clinical datasets, ensuring data integrity, accessibility, and FAIR compliance.

##### **B. Horizontal 2 – Participant and Public Engagement**

Fosters public trust and participation through education, stakeholder dialogue, dynamic consent, and transparent communication with biobank contributors.

##### **C. Horizontal 3 – Quality Assurance Process**

Implements a comprehensive quality management system for biobanking and sequencing operations, aligning with BBMRI-ERIC and ISO 20387 standards.

##### **D. Horizontal 4 – Data Sharing**

Creates a FAIR-aligned public genomic data portal (var.mt) providing secure, anonymised access to aggregate variant data from the Maltese population to advance open science.

- ii. The following criteria apply to the Pillars <and Horizontals>:

### **Criteria Regulating Pillars and Horizontals**

#### **A. Number and Scope**

The MALGENPOP Cluster shall comprise three core Research Pillars—Biobanking and Data Collection; Genomic Sequencing and Technologies; and Bioinformatics and Data Analysis and four Horizontals – Data Management and Integration; Participant and Public Engagement; Quality Assurance Process; and Data Sharing. Additional Pillars or Horizontals may be proposed by the Executive Committee (ExCo) in response to evolving strategic or scientific needs, subject to approval by a two-thirds majority of the ExCo.

#### **B. Pillar Coordination and Composition**

- a. Each Pillar shall be coordinated by a Pillar Coordinator who is a full member of the Cluster, appointed by the ExCo following an open internal call for expressions of interest.
- b. The initial Coordinators shall be appointed by the founding ExCo at the time of the Cluster's establishment; subsequent appointments shall follow a transparent, merit-based process.
- c. Each Pillar shall be composed of a minimum of three active members representing relevant expertise, including research, clinical, and technical staff, as applicable.
- d. The standard term of office for a Pillar Coordinator shall be two years, renewable once by ExCo decision. Coordinators may be replaced mid-term in cases of resignation, prolonged inactivity, or by a two-thirds majority vote of the ExCo.
- e. Criteria for appointment include demonstrable leadership in the relevant domain, at least five years of post-doctoral or equivalent professional experience, and an active research portfolio aligned with the Cluster's mission.

#### **C. Responsibilities of Pillar Coordinators**

- a. Provide scientific and strategic leadership within their domain.
- b. Convene regular Pillar meetings, report progress to the ExCo, and ensure that deliverables and KPIs are met.
- c. Facilitate collaboration across Pillars and Horizontals to ensure harmonisation of datasets, protocols, and training initiatives.
- d. Represent their Pillar in internal and external communications, funding applications, and collaborative agreements, as delegated by the ExCo.

#### **D. Horizontal Coordination and Composition**

- a. Horizontals shall operate as cross-cutting functional domains supporting all Research Pillars.
- b. Each Horizontal shall comprise one to three experts (minimum one), nominated

by the ExCo based on domain expertise and current involvement in the Cluster's activities.

- c. Horizontals shall not necessarily have a fixed Coordinator unless deemed essential by the ExCo for operational efficiency.
- d. Appointments within Horizontals shall have **no fixed term**, subject to periodic review by the ExCo to ensure continued relevance and performance.
- e. Horizontal members shall document and report their contributions to at least one Research Pillar annually, ensuring that horizontal support activities demonstrably enhance scientific outputs and data integration.

#### **D. Performance Review and Renewal**

The ExCo shall conduct biennial reviews of all Pillars and Horizontals, assessing alignment with the Cluster's strategic objectives, productivity, and inter-Pillar collaboration. The ExCo may recommend reconfiguration, merging, or termination of Pillars/Horizontals based on performance metrics, evolving research priorities, or resource constraints.

#### **E. Reporting Lines and Integration**

All Pillar and Horizontal Coordinators report directly to the ExCo. Deliverables, milestones, and proposed new initiatives must be documented in written reports submitted ahead of ExCo meetings. Inter-pillar working groups may be convened for cross-disciplinary projects as required.

- iii. During the course of its work, the Research Cluster may identify the need to establish additional pillars to cover emergent and important elements, or the need to remove an existent pillar.
- iv. The following criteria apply to the establishment of new Pillars:

##### **A. Purpose and Scope**

New Pillars may be established to address emerging scientific priorities, technological developments, or interdisciplinary themes that extend the scope of MALGENPOP while remaining aligned with its mission and strategic objectives.

##### **B. Proposal Submission**

- a. Proposals for new Pillars may be submitted by any full member of the Cluster, or jointly by a group of at least three members, to the Executive Committee (ExCo).
- b. The proposal must include:
  - i. a clear scientific and strategic rationale for the new Pillar,
  - ii. defined objectives, deliverables, and expected outcomes,
  - iii. identification of the proposed Coordinator and key contributing members,
  - iv. a preliminary work plan outlining milestones and integration points with existing Pillars and Horizontals, and

- v. an assessment of resource implications, including human, infrastructural, and financial requirements.

#### **C. Review and Evaluation Process**

- a. The ExCo shall review the proposal for scientific merit, complementarity with existing structures, feasibility, and sustainability.
- b. The ExCo may consult the Advisory Board and/or the External Stakeholders' Forum for expert and policy feedback prior to reaching a decision.
- c. The evaluation shall also consider the contribution of the proposed Pillar to national or European research priorities and to the long-term sustainability of the Cluster.

#### **D. Approval and Activation**

- a. Approval for the establishment of a new Pillar shall require a **two-thirds majority vote** of the ExCo.
- b. Once approved, the ExCo shall appoint an interim Pillar Coordinator and supporting members for an initial one-year term to oversee pilot activities and deliver an implementation report.
- c. The Pillar shall be formally integrated into the Cluster's structure upon successful completion of the pilot phase and submission of the first annual activity report.

#### **E. Rejection or Revision**

- a. If the proposal is rejected, the ExCo shall provide written feedback identifying the reasons for rejection and any revisions that could render the proposal eligible for reconsideration.
- b. Revised proposals may be resubmitted after a minimum period of six months, addressing the feedback provided.

#### **F. Periodic Review**

All newly established Pillars shall be subject to a formal review within two years of activation to assess performance, integration with existing structures, and ongoing relevance to the Cluster's mission. The ExCo may recommend continuation, re-alignment, or dissolution based on this review.

Once approved, any new pillar will follow the procedure established in Clause 3 above.

- v. The following criteria apply to the removal of existing Pillars and Horizontals:

#### **Grounds for Removal**

The Executive Committee (ExCo) may decide to dissolve, merge, or reclassify an existing Pillar or Horizontal where:

- A. the activity has demonstrated **limited or no scientific output** over two consecutive reporting periods;

- B. the objectives of the Pillar or Horizontal have become **redundant** or have been effectively **subsumed** within another structure;
- C. the activity is **no longer aligned** with the strategic objectives or scientific direction of the Cluster;
- D. the continuation of the Pillar or Horizontal is deemed **unsustainable** due to lack of participation, funding, or technical resources; or
- E. persistent failure to meet agreed deliverables, quality standards, or reporting obligations has been documented.

#### **Initiation of the Removal Process**

- A. A proposal for removal may be initiated by:
  - a. the ExCo itself,
  - b. any Pillar Coordinator or Horizontal lead, or
  - c. a group of at least three active Cluster members.
- B. The proposal must be submitted in writing to the ExCo and include:
  - a. a clear justification for removal or restructuring,
  - b. a summary of the affected activities and outcomes to date, and
  - c. recommendations for the disposition of ongoing projects, datasets, or personnel.

#### **Review and Consultation**

- A. Upon receipt of a proposal, the ExCo shall conduct a review of the scientific, operational, and strategic implications of the proposed removal.
- B. The ExCo may seek advice from the **Advisory Board** and/or the **Stakeholders' Forum** to ensure that the decision reflects both scientific and institutional considerations.
- C. If the affected Pillar or Horizontal has ongoing collaborations or externally funded projects, these shall be safeguarded or transferred before a final decision is enacted.

#### **Decision-Making Process**

- A. The decision to remove or merge a Pillar or Horizontal shall require a **two-thirds majority vote** of the ExCo.
- B. The decision, together with its rationale and effective date, shall be formally minuted and communicated to all Cluster members.
- C. In the case of disagreement or potential overlap, the ExCo may opt to initiate a six-month **transition phase** to assess whether restructuring rather than dissolution is more appropriate.

#### **Reconfiguration and Continuity**

- A. Where feasible, the ExCo shall ensure continuity of key expertise, data resources, and ongoing research within other Pillars or Horizontals.

- B. Dissolved or merged structures may be reinstated or redefined in the future following the procedures for the establishment of new Pillars.

### **Documentation and Reporting**

All decisions regarding the removal or restructuring of Pillars or Horizontals shall be recorded in the Cluster's annual report, including justifications, consultation outcomes, and the disposition of related resources.

4. The Research Cluster must maintain an up-to-date webpage, within the UM website framework detailing, among others, the statue, the organizational structure, current and past research projects, achievements, and deliverables.
5. The Cluster is subject to appropriate fiscal controls and audits that ensure that it remains true to its approved mission. All the UM's financial, human resources and research policies, IP policy, regulations, SOPs etc. shall apply to the Research Cluster.
6. The University Research Clusters Committee will review the Cluster every three years to decide whether it shall be allowed to continue its operations if an updated proposal for cluster continuation is submitted.
7. The Research Clusters Committee retains the right to dissolve the Cluster and/or the right to remove a cluster member for valid grounds, including among others, mismanagement, significant deviation from objectives, significant under achievement of targets/ deliverables, and transgressions related to research integrity.
8. Without prejudice to the fact that the funding of these Research Clusters by the UM significantly depends and is subject to the availability of governmental funding, the MALGENPOP cluster will operate as a revenue centre with the ability to raise its own funds, subject to the UM's financial and procurement regulations. Any revenue generated by the Research Cluster shall be used solely for re-injections into that same cluster fund.
9. Any grievances of any kind between the members of the Research Cluster and /or with Executive Committee should, in the first instance, be resolved internally using the Cluster governance structures. If unsuccessful, these should be brought to the immediate attention of the Research Clusters Committee. The Research Clusters Committee will investigate the grievances and aim to settle the issue amicably, it may if the need arises, propose remedial action where necessary for Council's approval.

## II. THE EXECUTIVE COMMITTEE

1. The Cluster shall be managed and overseen by an Executive Committee approved by University Council on the recommendation of the Rector, and shall have the following structure:
  - i. a maximum of 7 members who are Council appointed University of Malta Resident Academics, one of whom is nominated to act as Chair of the Committee, which shall include, but is not limited to, experts in the following areas: (a) Biobanking, (b) Bioinformatics and Genomics (c) Medicine and Surgery (d) Sociology. The appointment of the nominated Chair of the Executive Committee needs to be endorsed and approved by Rector. The Chair will be a UM resident academic who is also an expert in the area; and
  - ii. two (2) members from relevant stakeholders who are external to UM.
2. The Executive Committee will serve for a term of three (3) years, after which it may be reappointed.
3. The procedure for the selection of the Executive Committee members and nomination of the Chair shall be as follows:

The Executive Committee will consist of leading academic staff members from the respective pillar area(s) / horizontals.

To ensure renewal, accountability, and broad institutional representation, the Executive Committee will serve a renewable two-year term. At the conclusion of each term, a transparent internal election process will be initiated among full members of the MALGENPOP cluster.

Nominations for Executive Committee membership will be accepted from cluster members who have demonstrated consistent and active contribution to the cluster's pillars, horizontal themes, and overarching objectives. Candidates may be self-nominated or nominated by others, and nominations must be supported by at least two additional full members. Each member must declare what role they are interested in occupying. If the post is not contested, the interested academic will occupy the post. If a post is contested, the membership will vote.

The election process will be overseen by a senior academic from outside the cluster in their capacity as an external observer. This governance mechanism ensures rotational leadership, continuity of vision, and inclusive participation, while maintaining strategic alignment with the evolving priorities of the cluster.

External stakeholder representatives may continue their participation on the Executive Committee subject to institutional endorsement and relevance to the cluster's activities.

4. The quorum of the Executive Committee meetings of the Board shall be 5 members.
5. Apart from keeping regular Agendas and Minutes of meetings, the Committee shall regulate its own procedures during meetings, provided that every decision requires the approval of the majority of members at said meeting. It is recommended that the Executive Committee should meet regularly and as necessary, but should hold not less than three (3) meetings annually.
6. Subcommittees may be set up at the discretion of the Executive Committee, and shall be regulated internally by it.
7. The Executive Committee shall submit annual progress reports to the University's Research Clusters Committee. In this respect it is recommended that the Committee appoints a secretary for minute taking and recording purposes.
8. Any grievances of any kind between the members of the Executive Committee and /or with the Research Cluster should, in the first instance, be resolved internally using the Cluster governance structures. If unsuccessful, these should be brought to the immediate attention of the Research Clusters Committee, it may if the need arises, propose remedial action where necessary for Council's approval.

### **III. DISTRIBUTION AND OVERSIGHT OF FUNDS**

1. All funds shall be managed and all expenditures formally approved by the Chair of the Cluster. This approval is only a step in the standard procedures adopted by the University for the approval and disbursement of funds and expenses, which should be followed at all times.
2. As per Cluster Funding regulations, a Cluster is allowed to make changes to the financial plan that can take the form of either: (a) a shift from one budget heading to another; or (b) a transfer of funds from one year to another. While such shifts are regulated by the cluster funding rules, decisions in relation to such shifts require the approval of the Executive Committee by consensus voting of members present at the Executive Committee meeting.

## IV. THE STATUTE

1. This Statute is without prejudice to the Research Clusters Launch Plan Document issued by the Rector, dated \_\_\_\_\_.
2. This Statute and any subsequent amendments thereto must be approved by the Council of the University of Malta.

### **Executive Committee Members for 202X to 202Y**

The first Executive Committee shall be made up of:

Prof Godfrey LaFerla, Faculty of Medicine and Surgery

Prof Richard Muscat, Faculty of Medicine and Surgery

Prof Nikolai Pace, Faculty of Medicine and Surgery

Dr Laura Grech, Faculty of Health Sciences

Dr Brendon Scicluna, Faculty of Health Sciences

Prof Gillian Martin, Faculty of Arts

Dr Miriam Dalmas, Faculty of Health Sciences

Prof Josanne Vassallo, Faculty of Medicine and Surgery

Dr Panagiotis Alexiou, Centre for Molecular Medicine and Biobanking

**Signed by:** \_\_\_\_\_

**Name of Chair:** \_\_\_\_\_

**On this date:** \_\_\_\_\_
