| SUBJECT: | Accounting |
| :--- | :--- |
| PAPER NUMBER: | Specimen Paper |
| DATE: |  |
| TIME: | 3 hrs |

This examination paper consists of four sections. Follow instructions given in each Section.
Answer ALL questions in Section A. Section B consists of one compulsory question. Choose ONE question from Section $C$ and ONE question from Section $D$.

## SECTION A

Answer ALL the questions.

1) Identify THREE users of accounting information and explain why they would need this information.
2) Explain the difference between capital and revenue reserves, giving ONE example of each.
3) What is the purpose of calculating an overhead recovery rate?
4) Describe TWO situations where the time basis of remuneration is likely to be more suitable than piecework schemes.
5) Describe how the break-even point is calculated and explain why it is important for management.

## SECTION B

Answer this Compulsory question.
6. Agius Supplies Ltd operates a manufacturing concern producing ceramic products. The following balances have been extracted from the books of the company on $31^{\text {st }}$ December 2016.

| Trial Balance for the year ended 31 December 2016 |  |  |
| :--- | :---: | :---: |
|  | DR | CR |
|  | $\mathbf{C}$ | $\mathbf{C}$ |
| Ordinary Share Capital of €1 each |  | 250,000 |
| General Reserve |  | 40,000 |
| Retained Earnings |  | 36,125 |
| 5\% Bank loan | 520,000 | 180,000 |
| Buildings | 356,000 |  |
| Machinery | 89,200 |  |
| Furniture and fittings | 66,500 |  |
| Motor vehicles |  | 72,800 |
| All for depreciation - Buildings |  | 178,000 |
| All for depreciation - Machinery | 64,365 |  |
| All for depreciation - Furniture \& Fittings | 36,800 |  |
| All for depreciation - Motor Vehicles | 1,650 |  |
| Factory rent | 958 |  |
| Vehicles expenses | 158,700 |  |
| Stationery | 65,400 |  |
| General expenses | 123,000 |  |
| Factory Direct wages | 17,200 |  |
| Supervisor salaries | 52,000 |  |
| Directors' salaries | 13,350 | 7,890 |
| Water and electricity bills | 7,452 |  |
| Power |  | $1,205,600$ |
| Returns | 395,200 |  |
| Carriage outwards | 98,600 |  |
| Sales | 3,620 |  |
| Purchases of raw material | 36,900 |  |
| Inventory 1 Jan 2016 - Raw material | 5,900 |  |
| Inventory 1 Jan 2016 - Work in progress | 21,600 |  |
| Inventory 1 Jan 2016 - Finished goods | 43,600 |  |
| Cleaning expenses | $\mathbf{2 , 1 7 9 , 6 3 0}$ | $\mathbf{2 , 1 7 9 , 6 3 0}$ |
| Bank |  |  |
| Cash |  |  |
| Trade receivables |  |  |
| Trade payables |  |  |
|  |  |  |
|  |  |  |

## Additional information:

1. Closing Inventory totals were as follows:

| Raw Materials | $€ 76,400$ |
| :--- | :--- |
| Work in progress | $€ 2,265$ |
| Finished |  |

2. The factory rent paid covers the 10 month period till end of October 2016. The contract for the factory rent expires in 2020, and the rent payable shall be revised on renewal of the contract.
3. Depreciation is to calculated as follows:

| Buildings | $2 \%$ on Cost |
| :--- | :--- |
| Machinery | $15 \%$ on Net book value |
| Furniture and fittings | $10 \%$ Straight line method |
| Motor Vehicles | $20 \%$ Reducing balance method |

4. A trade receivable was declared bankrupt and the balance owing of $€ 1,250$ is to be written off. After this experience, the company decided to start providing a $2 \%$ allowance of trade receivables as doubtful debts.
5. No interest has yet been paid on the loan, which was drawn down on 1 January 2016.
6. In December 2016, the bill paid for water and electricity included $€ 120$ for rent of metres relating to January 2017.
7. The following expenses are to be apportioned as follows:

|  | Factory | Admin | Distribution |
| :--- | :---: | :---: | :---: |
| Vehicles' costs/vehicles' depreciation | $50 \%$ | $10 \%$ | $40 \%$ |
| General expenses | $25 \%$ | $60 \%$ | $15 \%$ |
| Water and Electricity | $10 \%$ | $60 \%$ | $30 \%$ |

8. The Directors of Agius Supplies Ltd decided to transfer $€ 5,000$ to the General Reserve.

## Required:

a. Prepare the Manufacturing Account of Agius Supplies Ltd for the year ended 31 December 2016.
b. Prepare the statement of profit or loss and the statement of changes in equity for the year ended 31 December 2016.
c. Prepare the Statement of Financial Position of Agius Supplies Ltd as at 31st December 2016.

## SECTION C

Choose ONE question from this section.
7. CardJo Ltd wants to analyse the results of its trading for the year ended $31^{\text {st }}$ March 2017 and has prepared the following Financial Statements.

## CardJo

Statement of Profit or Loss for the year ending 31st March

|  | $\mathbf{2 0 1 7}$ |  | $\mathbf{2 0 1 6}$ |  |
| :--- | :---: | :---: | :---: | :---: |
|  | $\boldsymbol{€}$ | $\boldsymbol{€}$ | $\boldsymbol{€}$ | $\boldsymbol{€}$ |
| Sales |  | 13,000 |  | 10,000 |
| Less Cost of Sales |  |  |  |  |
| Opening Inventories | 550 |  | 450 |  |
| Purchases | 7,300 |  | 6,200 |  |

| Total liabilities |  | 6,070 |  | 3,025 |
| Total equity and liabilities |  | 17,815 |  | 13,500 |

## Required:

a) Calculate (to 2 decimal places) the following ratios for each of the years ended $31^{\text {st }}$ March 2016 and 2017:
i. Gross profit margin
ii. Net profit margin
iii. ROCE
iv. Current Ratio
v. Acid Test Ratio
vi. Trade Receivables collection period
vii. Trade Payables payments period
b) Using the ratios calculated in (a), compare the performance and liquidity of CardJo Ltd over the two years.

## (Total: $\mathbf{2 5}$ marks)

8. Global Ltd.is a company that delivers imported furniture to Maltese customers. Depreciation is calculated at the rate of $20 \%$ per annum using the reducing balance method. A full year's depreciation is charged on all vans held at year end. No depreciation is charged in the year of disposal.

On 1 January 2016, the vans in use had a cost of $€ 25,500$ and the total depreciation allowance amounted to $€ 15,824$. In the course of the following twelve months the following events occurred:

31 January 2016: A van that had been bought in 2013 for $€ 10,500$ was involved in a collision and was a complete write-off. The insurance company paid $€ 4,100$ in compensation on 15 April 2016.

15 May 2016: A van which cost $€ 7,500$ in 2014 was part-exchanged for a new one costing $€ 13,750$. The trade-in allowance was agreed at $€ 3,250$, with the rest being paid by cheque.

31 July 2016: Two vans were bought for $€ 10,000$ each. Insurance and maintenance on each van is expected to amount to $€ 1,000$ annually. Given the nature of the business, an additional $€ 5,000$ was spent to install lifting equipment in the vans.

## Required:

a) Prepare the following accounts of Global Ltd for the year ended 31 December 2016:
(i) The motor vans account;
(ii) The allowance for depreciation account - Motor Vans;
(iii) The asset disposal account.
b) Describe the Accruals Concept and explain how it is applied when depreciating noncurrent assets.
(Total: $\mathbf{2 5}$ marks)

## SECTION D

Choose ONE question from this section.
9. Elaine Callus is considering starting a business on 1 September 2017. She is planning to introduce cash of $€ 24,000$ and borrow $€ 12,000$, interest free, from her father. She plans to repay her father in monthly instalments of $€ 500$ starting December 2017. She has approached her bank to negotiate an overdraft agreement. The bank has asked her to prepare a cash forecast for her first four months of operation. Her assumptions are the following:

1. On 1 September 2017 fixtures and equipment will be purchased on credit for $€ 47,000$. $20 \%$ are to be paid immediately. The rest are expected to be paid in $€ 2,000$ monthly installments starting October 2017. The fixtures and equipment are expected to have a useful life of 5 years and a residual value of $€ 2,000$.
2. Sales in the first two months of trading are expected to be $€ 60,000$ each month. These are expected to increase to $€ 80,000$ by November, and increase by another $10 \%$ of the previous month's sales in December.
3. Sales will be made both on cash and credit terms. $40 \%$ will be for cash and the remaining $60 \%$ on credit. Credit customers are expected to pay the amount due in the month following the one in which the sale is made.
4. Ms Callus has budgeted purchases for the four months as follows:

| September | October | November | December |
| :---: | :---: | :---: | :---: |
| $€ 24,000$ | $€ 30,000$ | $€ 40,000$ | $€ 48,000$ |

5. $50 \%$ of purchases are expected to be paid in the same month of purchase, while the rest are expected to be paid in the month after purchase.
6. During September 2017, $€ 25,800$ is expected to be paid for rent, and $€ 9,900$ for insurance. Both amounts represent annual charges paid in advance.
7. Monthly cash payments will be made in respect of wages $€ 16,000$, general expenses $€ 2,000$ and cash drawings of $€ 4,500$.
8. The first water and electricity bill amounting to $€ 2,500$ is expected to be paid in November 2017.

## Required:

Prepare a monthly cash budget for the first four months of Elaine Callus' business, showing clearly the cash balance at the end of each month.
(Total: 25 marks)
10. John sells Do-It-Yourself kits. He uses the perpetual FIFO system of inventory valuation. On $1^{\text {st }}$ April there were 150 kits in stock with a total value of $€ 20,700$. Stock movements during the month of April were as follows:

| Date | Kits Purchased | Purchase Price Per Unit © | Kits Sold |
| :---: | :---: | :---: | :---: |
| April 05 | 200 | 140 |  |
| April 11 |  |  | 275 |
| April 15 | 170 | 145 |  |
| April 22 |  |  | 180 |

Kits are sold at a standard price of $€ 220$ per Kit.

## Required

a) Calculate the value of the closing inventory at the end of April using the perpetual FIFO method.
b) John would like to know what his inventory value would be had he used the perpetual AVCO method. Calculate the closing inventory using this method. (The Inventory value per Kit is to be calculated to the nearest two decimal places).
c) Calculate the Gross profit for each method of inventory valuation and explain why the profit differs.
d) John's accountant suggested that the monthly periodic stock inventory would be practical and quick. Calculate the closing inventory at end of April using the AVCO Periodic method.
e) Why is it important to control inventory levels? Mention TWO expenses associated with overstocking.
