Secondary Education Certificate Examinations: Attainment Overview

Supplementary Session 2025

The following statistical tables present the outcomes of the 2025 SEC Supplementary Session, which is the first year in which the revised SEC assessment model has been implemented. Results are therefore being reported using the updated framework, which includes separate information on:

- Overall Levels Awarded (Level 3, Level 2, Level 1, and Not Awarded)
- Paper II Grade Distribution (Grades 1–8 and U)
- Paper I (School-Based Assessment) Average Marks, reported per Paper II Grade

This refined structure allows for a clearer understanding of candidate performance across different components of the examination. Only the subjects and respective paper options offered in the Supplementary Session are shown. For each one, the data show the number of candidates achieving each overall Level, followed by the distribution of grades obtained in Paper II. Additionally, the average SBA mark corresponding to each Paper II grade has been included to provide further insight into how coursework performance relates to examination outcomes.

As this is the first cohort assessed under the new SEC model, any comparisons with previous years should be approached with caution. The introduction of SBA reporting by grade, together with revised grade boundaries associated with the updated structure, represents a significant methodological shift. Future sessions will allow for a more stable pattern of comparison as the new model becomes established.

The total number of registrations for the SEC 2025 Supplementary session is 1327.

Subjects with Paper Option	Number of Candidates														SBA Average per Paper II Grade
