& Sustainable Development

Graduate Research Log Book
M.Sc. by Research (Sustainable Development)
Part-time students

This log has been prepared to assist you throughout your dissertation. It provides a framework for recording details related to your graduate research, scheduled supervisory meetings and activities concerning the development of academic and key skills. Your log will also help you to self evaluate and plan your development of academic and discipline specific skills. The log is intended to record your general academic and personal progress, and may be used by the Board of Studies and Board of Examiners to assess the progress and development of your studies.

The log is divided into a number of sections that basically chart the student's progress and monitors the supervisor's role in the development of the post-graduate dissertation. The log is also useful in keeping a tab on the contacts made throughout the research period and the departments, offices and officials visited in obtaining information, building contacts and searching in libraries. It will also be an indispensable guide to formulate your CV, once you finish your studies.

If Found

This log book is an important part of the student's development. If found, please return it to the Institute for Climate Change and Sustainable Development, University of Malta, Msida MSD2080.
