

Project no.: H2020-MSCA-RISE-2017-778233
Project full title: Behavioural Application Program Interfaces
Project Acronym: BEHAPI
Deliverable no.: D.5.3 (M24) Draft version

Title of Deliverable: Website of the project
Work package: WP5
Type: DEC
Lead Beneficiary: **NOVA.ID (BEN 3, NOVA)**
Dissemination Level: PU
Number of pages: 1
Contract Delivery due date: 29/2/2020 (M24)

Acknowledgement: This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 778233

This deliverable reports on the evolution during the second year of the project of its web site (www.um.edu.mt/projects/behapi/).

The project web site is acknowledged by the project members as a vital tool for communication, not only internal but also to present the project vision and results (Task T.5.6) - on one hand the main page presents in a condensed way the gist of the project, together with the latest news on its activities, and on the other hand it provides quick access to the publications, secondment reports, and events. It serves thus as an open-access repository (contributing to Task T.5.8) and is a central tool to achieve the exploitation objectives O.5.1, O.5.2 and O.5.3

Project participants can contribute to the website, by logging in and submitting new information/material that is then approved either by the site leader, the Work-package leader, or the project leader. This decentralised and proactive approach allows for more updates and to keep the site alive, not depending on a (small) central team.

This second year corresponded to the first one of having the site fully functioning and achieving its purpose.
