

Brian Pulis B Eng.

Production Engineer
Oerlikon
Zurich, Switzerland.

Personal Profile

Brian was raised and educated in Malta, the older of two brothers. He spent most of his childhood in Dingli. Brian studied engineering at the University of Malta and graduated in Electrical engineering.

He then worked locally in industry for a while until he decided to go abroad with his young family to work in Switzerland, more specifically in Zug outside Zurich at Oerlikon, where he works as a production engineer.

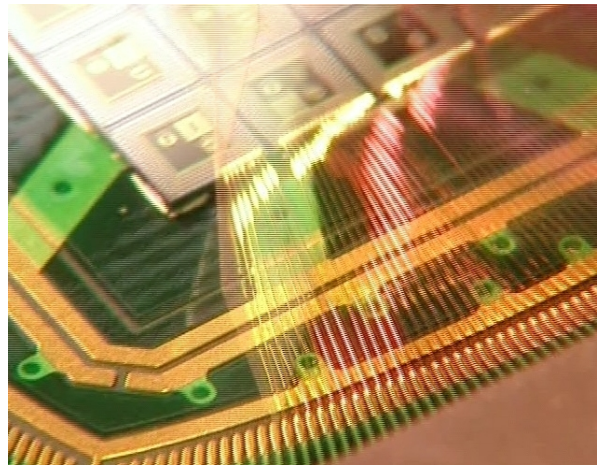

Brian is married to Sharon, a mathematics teacher and they have a young son. Brian loves spending time with his family in the beautiful surroundings of his new home.

Brian with his family enjoying the Swiss sunshine.

Research Profile

Brian's main work is in the review of the assembly lineage and assessing how to improve and perfect production lines for the chip making machinery which the factory supplies.

Other interests.

Brian is a very keen photographer and also has an interest in voluntary work – it is in fact on one such trip that he met his then wife to be.
